Reinstatement Report

Stn 9–18 fixed by OIP's at either end shown on SP231385 and IS229103. This measured deed distance.

Stn 4–1 fixed by reinstated corner Stn 4 to O.Screw at Stn 1. Deed angle measured at Stn 4 but distance was +0.022m. This was proportioned.

Lot 9029 on SP226924 is intended to be 10m wide and parallel. There is a lack of secant connections or reference marks on the boundary closest to Mooloolah River but closure confirms this intention, Secants at 14 to 8 were used to define 14a to 8a. Distance agrees with deed.

The creek traverse was calculated from field notes from CG1038. Stn's 2 and 2a on CG1038 are coincidental with Stn's 24 and 25 on SP147314. From Stn 25 on SP147314 deed distance and angle was used for line through Stn's 25–26–27–29. Stn's 27 and 29 are coincidental with Stn's 7 and 6 on SP226924. This line was used to swing the original creek traverse from CG1038 onto the current datum. Stn's 9a & a on CG1038 were searched with No O.Mk's found.
