Petrie Creek Road Upgrade - Rosemount

Project update

Works are continuing on the Petrie Creek Road Upgrade project.

Recent heavy rains and storms have slightly delayed construction activities however we are pleased to advise that Petrie Creek Road will REOPEN to two-way through traffic from the week beginning, Monday 14 December 2026 (weather permitting).

The existing Paynters Creek Road detour will discontinue when Petrie Creek Road opens. We thank residents and local businesses for your cooperation and patience during the detour period.

As per our recent October 2026 update, with Petrie Creek Road OPEN to two-way traffic Stage 2 works will continue, followed by Stage 3 (part) and Stage 4 through to June 2027. No further full road closures are expected.

This update covers the December 2026 and January 2027 period and we will be back in touch in late January/early February 2027 with our next project update.

December 2026 – June 2027 (subject to weather conditions). Stage 2, part Stage 3 and Stage 4 works. Refer below for stage sections.

Stage 2 ongoing works – December 2026 to March 2027. Petrie Creek Road, western intersection with Paynters Creek Road to Eastern Service Road intersection approx. 400m.

Continued retaining wall, earthworks, service relocation, roadside embankment, guardrail and turfing.

Part Stage 3. March 2027 to May 2027. Approx. 80-metre-long section of Petrie Creek Road from the Eastern Service Road intersection transitioning to the existing road. Services relocations, road widening works, new asphalt (bitumen) and line marking.

Stage 4. May 2027 to June 2027. Finishing works of Stages 1, 2 and part Stage 3. Slope stability, road resurfacing, signage, line marking and revegetation.

Some Stage Two works will continue through to early 2027, however Petrie Creek Road will be open to through traffic with traffic control or changed road conditions as required for safety.

Details of the road reopening date and outstanding works will be confirmed in mid-November, pending the progress of works between now and then.

Temporary changes to traffic conditions

During Stage 2 ongoing works Petrie Creek Road will remain OPEN to through traffic in both directions.

For our community's and construction workers' safety a 40km per hour speed limit will be in place within the construction area. Signage will be in place. Please allow a few extra minutes of travel time.
Access to the Service Road will remain available.

Sunshine Coast COUNCIL

Part Stage 3 works will be undertaken using a 'contra-flow' arrangement on Petrie Creek Road with traffic travelling in both directions, in one direction at a time. Temporary traffic signals will manage traffic flow. We will provide further information in our next update.

For **Stage 4 works** (the finishing works of Stages 1, 2 and 3) Petrie Creek Road will remain OPEN to two-way traffic in both directions with temporary 40km reduced speed limits as required.
Intermittent traffic control will be implemented in all stages as required for safety reasons.

Contact us

For more information about this project, please visit our website, or call the customer contact team on 07 5475 7272 quoting Petrie Creek Road Upgrade project.

Please share this information with family, friends, staff and suppliers.
