

Construction notification

Project numbers: P-H4998, P-K9488 & P-H4693

12 August 2026

Sugar Road and Maud Street Transport Corridor Upgrade

Vacant properties removal (day works)

Estimated timing: Early September 2026 to February 2027 (weather permitting)

Various locations along Maud Street, Maroochydore

Two-way traffic remaining on Maud Street with traffic control in operation as required.

Project overview

Sunshine Coast Council is planning to make the Sugar Road and Maud Street corridor (from Bungama Street to Wisers Road), safer and more efficient for all users. The ultimate project will be delivered across multiple stages and includes:

- new, separated pathways for walking and riding
- new signalised and raised priority crossings at key intersections
- widening Sugar Road-Maud Street from two to four lanes (two lanes each way)
- making the area greener and more comfortable and enjoyable for walking and riding
- providing a transport corridor that supports a vibrant, connected and future-ready Maroochydore.

You can learn more about the project and see a [FLY THROUGH](#) video of the ultimate concept design by visiting the webpage. Search for 'Maroochydore Sugar Road and Maud Street Upgrade' on Council's website.

The upgrading of Sugar Road-Maud Street will complement Maroochydore's status as a Priority Development Area (PDA). Read more about the [Maroochydore PDA](#) on Council's website.

Ongoing early works

As part of the project's progress, early works are taking place ahead of the longer-term detailed design and construction of the new transport corridor.

To date, works have included line marking changes, footpath and cycle ramp improvements and underground service and geotechnical investigations.

The next phase includes the removal of vacant properties along Maud Street where land is required to accommodate the ultimate four-lane configuration (two lanes each way) of Sugar Road-Maud Street.

Plans have been in place for more than 20 years to upgrade the corridor. Council has been liaising with property owners since 2014.

Works will continue to be phased to minimise impacts to our community.

All information contained in this communication is accurate at the time of distribution however works and dates are subject to change due to circumstances outside of Sunshine Coast Council's control.

What to expect during these works

Local company Evans Built has been appointed as the removal contractor.

Activities are expected to have minimal impact on Maud Street traffic movements. Short term traffic control and pedestrian diversions may be required at times for safety reasons.

Access will remain available to adjacent residences and businesses.

Signage and fencing will be erected. Specialist equipment and machinery, including construction vehicles and large trucks will be in operation.

Tests and inspections have been undertaken as required, including for the presence and safe handling of asbestos. The contractor will exercise careful and considered demolition methods which allow the contractor to:

- manage community and worker safety
- comply with all environmental guidelines
- appropriately sort and dispose of materials.

Intermittent noise can be expected during the day. Dust suppression methods will be used.

We will continue to keep you updated about the project via our regular notifications and the project's [webpage](#).
