

Explanatory Note for Flood Prone Land

The anticipated extent of flood prone land as depicted is generally based on the Defined Flood Event (DFE) flood Level.

DFE is the flood event adopted by Council for the management of development in a particular locality. The DFE depicted on the Flood Prone Land map typically represents a 1% Annual Exceedence Probability (AEP) (100 year Average Recurrence Interval).

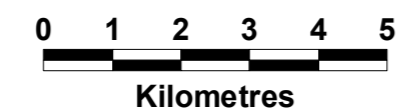

AEP is the likelihood of occurrence of a flood of a given size or larger in any one year, usually expressed as a percentage.

Legend

- State Roads
- Land Parcels
- Drainage Deficiency Areas
- Flood Prone Land
- Planning Scheme Area Boundary

Note: For all Cadastre on all mapping, please refer to the CD Version or Development Assessment, Information Services Support Officers located in Nambour or Maroochydore.
