10.3 Palmview Structure Plan

10.3.1 Preliminary

10.3.1.1 Introduction

This Part comprises the Palmview Structure Plan.

10.3.1.2 Purpose of Structure Plan

The Palmview Structure Plan provides an integrated land use and infrastructure framework for the Master Planned Area.

10.3.1.3 Master Planned Area

10.3.1.3.1 Master planned area declaration details

The declaration details for the Palmview master planned area are specified in **Table 10.3.1.3.1 (Palmview master planned area declaration details)**.

Table 10.3.1.3.1 Palmview master planned area declaration details

Date of declaration	18 December 2009

planned area map	context (refer to Schedule 2 (Mapping))

10.3.1.4 Structure Plan Elements

- (1) The Palmview Structure Plan comprises the following elements:-
 - (a) the strategic outcomes for the Master Planned Area;
 - (b) the category of development (referred to as the level of assessment) and codes for development in the Master Planned Area;
 - (c) a Palmview structure plan area code.
- (2) The Palmview Structure Plan is supported by the following:-
 - (a) Sunshine Coast Planning Scheme;
 - (b) the Planning scheme policy for the Palmview Structure Plan;
 - (c) infrastructure arrangements which apply to land in the Master Planned Area.
- (3) The structure plan maps detailed in **Table 10.3.1.4 (Master Planned Area Maps)** identify in a spatial context the outcomes intended for the Master Planned Area.

10.3.1.5 Relationship to the Sustainable Planning Act 2009

The Palmview Structure Plan provides a structure plan for a declared Master Planned Area which specifies the following:-

- a strategic framework, including strategic outcomes for the Master Planned Area that applies to assessable development requiring impact assessment in the Master Planned Area; and
- (b) a Structure Plan Area Code that applies to self assessable and assessable development in the Master Planned Area.

10.3.1.6 Compliance with the Structure Plan

- (1) The following rules apply in determining compliance with the Palmview structure plan area code for self assessable development:-
 - (a) the development must comply with the acceptable outcomes in the Palmview structure plan area code:
 - (b) where the development does not comply with the acceptable outcomes the development becomes code assessable development unless stated to be impact assessable development.
- (2) The following rules apply in determining compliance with the Palmview Structure Plan for assessable development requiring code assessment:-
 - (a) the development complies with the Palmview Structure Plan if it complies with the performance outcomes of the Palmview structure plan area code or the overall outcomes of the Palmview structure plan area code if it does not comply with the performance outcomes.
- (3) The following rules apply in determining compliance with the Palmview Structure Plan for assessable development requiring impact assessment:-
 - (a) the development complies with the Palmview structure plan area code if it complies with the performance outcomes of the Palmview structure plan area code or the overall outcomes of the Palmview structure plan area code if it does not comply with the performance outcomes; and
 - (b) the development complies with the strategic outcomes for the Palmview Structure Plan if it is consistent with the strategic outcomes for the Palmview Structure Plan.

10.3.1.7 Relationship to State Planning Instruments

This matter is dealt with in Section 2.1 of the Sunshine Coast Planning Scheme 2014.

10.3.1.8 Relationship to Sunshine Coast Planning Scheme

- (1) The following provisions of the *Sunshine Coast Planning Scheme* apply to the assessment of development for the Master Planned Area:-
 - (a) Part 1 (About the planning scheme);
 - (b) Part 3 (Strategic framework);
 - (c) Part 4 (Priority infrastructure plan);
 - (d) Section 8.2.1 (Acid sulfate soils overlay code), Section 8.2.4 (Bushfire hazard overlay code) and Section 8.2.7 (Flood hazard overlay code) of **Part 8 (Overlay codes)**;
 - (e) Part 9 (Other codes):
 - (f) Part 10 (Other plans);
 - (g) **Schedule 1 (Definitions)** except for the terms defined in Section 10.3.1.12 11 (Structure Plan Definition of Terms):
 - (h) Other Plans Map OPM P1 to P14 in **Schedule 2 (Mapping)**;
 - the overlay maps in Schedule 2 (Mapping) related to the acid sulfate soils overlay and bushfire hazard overlay as applicable to the Master Planned Area;
 - (j) Schedule 4 6 (Planning scheme policies).
- (2) The provisions of the Palmview Structure Plan prevail over the other provisions of the *Sunshine Coast Planning Scheme* to the extent of any inconsistency.

10.3.1.9 Planning Scheme Policy for the Palmview Structure Plan

A planning scheme policy for the Palmview Structure Plan may provide for the following:-

- (a) information that Council may request for a development application in the Master Planned Area;
- (b) guidance about the achievement of outcomes for the Master Planned Area; and
- (c) standards identified in the Palmview structure plan area code.

10.3.1.10 Infrastructure Arrangements

- (1) An infrastructure arrangement is:-
 - (a) an infrastructure agreement entered into between an owner of land in the Master Planned Area and the Council which is identified as an infrastructure arrangement for the purposes of this document;
 and
 - (b) any other infrastructure funding or delivery measure that may be imposed by or agreed to by the State government or any other public sector entity.
- (2) An infrastructure agreement has been entered into for land in the Master Planned Area.

10.3.1.11 Structure Plan Definition of Terms

In the Palmview Structure Plan:-

Affordable housing means housing for which low to moderate income earning households pay no more than 30 percent of gross household income on rent and no more than 35 percent for home purchase and that is appropriate to the needs of low-income households in terms of design, location and access to services and facilities.

Defined flood event means the modelled 1:100 year Average Recurrence Interval flood level with a provisional allowance based on the projection by the Intergovernmental Panel on Climate Change (IPCC) for the effects of climate change on rainfall intensity and sea level rise.

Ecological rehabilitation means the application of specific techniques, either active or passive, to rehabilitate disturbed, degraded, reduced or otherwise compromised ecosystems to a more natural extent, structure and ecological function.

Ecologically important area means an ecologically important area specifically identified on **Other Plans Map OPM P2(b) (Palmview Master Planned Area Ecologically Important Areas)**¹⁹ being an area which comprises one or more of the following:-

- (a) State significant vegetation;
- (b) State, regional or local habitat corridor;
- (c) ecological buffer;
- (d) land in Queensland conservation estate (i.e. National Park and Conservation Park).

Environmental enhancement area means an environmental enhancement area specifically identified on Other Plans Map OPM P12 (Palmview Master Planned Area Non-urban Open Space Infrastructure Network) being an area which:-

- (a) provides continuity between habitat;
- (b) is of the following types:-
 - (i) Type A, being an area undergoing natural regeneration;
 - (ii) Type B, being an area located such that it provides a strategic opportunity for the creation of a large and intact ecological area; and
- (c) has been determined to represent a high priority for ecological rehabilitation.

Environmental protection area means an environmental protection area specifically identified on Other Plans Map OPM P12 (Palmview Master Planned Area Non-urban Open Space Infrastructure Network) being an area which comprises one or more of the following:-

- (a) an endangered regional ecosystem, of concern regional ecosystem or least concern regional ecosystem under the *Vegetation Management Act 1999*;
- (b) habitat or likely habitat for scheduled species under the Nature Conservation (Wildlife) Regulation 2006;
- (c) areas or likely areas of listed threatened species, listed threatened ecological communities, protected critical habitat or listed migratory species under the *Environment Protection and Biodiversity Conservation Act 1999*;
- (d) essential habitat as mapped by the State government for the purposes of regulating vegetation clearing under the *Vegetation Management Act 1999*;
- (e) a spring under the Water Act 2000;
- (f) stream orders 3, 4 and 5 of watercourses under the Water Act 2000;
- (g) a coastal wetland, tidal waters, erosion prone area or coastal management district under the Coastal Protection and Management Act 1995;
- (h) a wetland as mapped by the State government in partnership with the Commonwealth Government through the Queensland Wetlands Program;
- (i) habitat for flora or fauna species of local ecological significance.

Environmental transition area means an environmental transition area specifically identified on Other Plans Map OPM P12 (Palmview Master Planned Area Non-urban Open Space Infrastructure Network) being an area which is required to separate and buffer the environmental protection area and the environmental enhancement area from the sources of environmental impacts and protect important habitat corridors.

Flood prone land means the land inundated by the defined flood event as specifically identified on Other Plans Map OPM P2(a) (Palmview Master Planned Area Flood Prone Land)²⁰ or as otherwise identified in the flood hazard provisions of the Sunshine Coast Planning Scheme applicable to land within the Master Planned Area.

Infrastructure arrangement see Section 10.3.1.10(1) (Infrastructure Arrangements).

Net residential density means housing density expressed as dwellings per hectare, calculated by dividing the number of dwellings created by the total of the area of residential lots plus the area of local roads and parks.

Scenic amenity and highway acoustic buffer means the non-urban land area adjacent to the Bruce Highway as specifically identified on Other Plans Map OPM P12 (Palmview Master Planned Area Non-urban Open Space Infrastructure Network) being the area that is intended to maintain the appearance of the natural and landscape separation between urban communities, protect the visual amenity of the Bruce Highway as a scenic route with a natural and rural edge and protect the amenity of the future Palmview community.

SEQ Regional Plan means the South East Queensland Regional Plan 2009-2031.

Part 10

Other Plans Map OPM P2(a) (Palmview Master Planned Area Flood Prone Land) and Other Plans Map OPM P2(b) (Palmview Master Planned Area Ecologically Important Areas) specifically identifies the primary biophysical constraints which define the extent of land suitable for urban development in the Master Planned Area.

Other Plans Map OPM P2(a) (Palmview Master Planned Area Flood Prone Land) and Other Plans Map OPM P2(b) (Palmview Master Planned Area Ecologically Important Areas) specifically identifies the primary biophysical constraints which define the extent of land suitable for urban development in the Master Planned Area.

Universal design means the design of the built environment to be usable by all people without the need for further adaption or specialised design.

10.3.2 Master Planned Area Strategic Framework

10.3.2.1 Introduction

- (1) This section provides a strategic framework for the Master Planned Area.
- (2) The strategic framework seeks to achieve ecological sustainability as defined by the *Sustainable Planning Act 2009* and is the basis of the outcomes specified in the Palmview Structure Plan.
- (3) The strategic framework comprises the following for the Master Planned Area:-
 - (a) a context and setting statement;
 - (b) the strategic outcomes.

10.3.2.2 Master Planned Area Context and Setting

- (1) This section is extrinsic material under section 15 of the *Statutory Instruments Act 1992* and assists in the interpretation of the Palmview Structure Plan and does not form part of the Palmview Structure Plan.
- (2) The context and setting of the Master Planned Area is as follows:-

The Master Planned Area is located immediately south of the Sippy Downs/Chancellor Park urban community and to the west of the Kawana Town Centre and the Kawana Waters Community Development Area.

The Master Planned Area is approximately 926 hectares in area with boundaries generally defined by:-

- (a) Sippy Creek, Cavalry Road, Claymore Road and Mooloolah River National Park in the north;
- (b) the Mooloolah River in the east;
- (c) the Palmview Conservation Park, Laxton Road and the Mooloolah River in the south; and
- (d) the Bruce Highway in the west.

The Master Planned Area is characterised by gently undulating topography which reflects its location within and on the margins of the coastal plain. The Master Planned Area generally slopes down from its western and central parts to Sippy Creek and the Mooloolah River.

Approximately 45% of the Master Planned Area is subject to the defined flood event. Acid sulfate soils exist in low lying parts of the Master Planned Area.

Although large parts of the Master Planned Area have previously been cleared to accommodate rural activities, stands of remnant vegetation remain in corridors adjacent to waterways and in peripheral areas.

The Master Planned Area currently forms part of a large non-urban area that separates the Caloundra Coastal urban area from urban communities on and surrounding the Buderim plateau.

10.3.2.3 Master Planned Area Strategic Outcomes

- (1) The strategic outcomes for the Master Planned Area comprise the following:-
 - (a) intent for structure plan area;
 - (b) intent for preferred dominant land use areas;
 - (c) land use structure;
 - (d) open space;
 - (e) character and identity;
 - (f) residential development;
 - (g) centres and employment;
 - (h) integrated transport;
 - (i) infrastructure;
 - (j) community wellbeing;
 - (k) ecological sustainability and environmental management.

- (2) The following structure plan maps spatially represent elements of the strategic outcomes for the Master Planned Area:-
 - (a) Other Plans Map OPM P1 (Palmview Master Planned Area and Regional Context);
 - (b) Other Plans Map OPM P2(a) (Palmview Master Planned Area Flood Prone Land);
 - (c) Other Plans Map OPM P2(b) (Palmview Master Planned Area Ecologically Important Areas);
 - (d) Other Plans Map OPM P3 (Palmview Master Planned Area Land Use Structure);
 - (e) Other Plans Map OPM P4 (Palmview Master Planned Area Infrastructure Elements);
 - (f) Other Plans Map OPM P5 (Palmview Master Planned Area Development Entitlements).

10.3.2.4 Strategic Outcome 1 – Intent for Master Planned Area

- (1) The Palmview Master Planned Area is developed as a transit oriented community that promotes ecologically sustainable development.
- (2) Development in the Master Planned Area complements Sippy Downs and contributes to the creation of an integrated community, offering a range of affordable living and employment opportunities, social services, complementary business and commercial uses, community facilities and recreational experiences.
- (3) Development in the Master Planned Area provides for the protection and enhancement of waterways, wetlands, bushland and the Mooloolah River floodplain such that climate resilience is enhanced and a network of green open space is established that defines the boundary of urban development and provides an attractive setting for neighbourhoods.
- (4) Development in the Master Planned Area provides for sustainable stormwater management infrastructure which protects water quality, environmental values and public health.
- (5) Development in the Master Planned Area provides for the rural and natural qualities which distinguish the Sunshine Coast from other areas to be maintained through the provision of a wide green multi-purpose buffer to the Bruce Highway, ensuring the character and visual amenity values of this important gateway are sustained.
- (6) Development in the Master Planned Area contributes to the creation of a high quality lifestyle with a diversity of housing choices available to meet all life stages and affordability. A community of compact, distinct, well connected, walkable and thoughtfully designed neighbourhoods are established that provide safe, pleasant and friendly places to live and promote a sense of community and community responsibility. The Sunshine Coast's subtropical, outdoor lifestyle is celebrated with high quality community and open spaces for people of all ages to socialise, exercise and play.
- (7) Development in the Master Planned Area provides for high quality design and construction of civil works, buildings, places and spaces that create a distinctive look and feel that strongly reflects appropriate responses to landscape setting, local climatic influences and the contemporary, vernacular, subtropical coastal building style. Houses, businesses and community buildings are designed and built to 'sit' in a green, leafy landscape.
- (8) Development in the Master Planned Area provides for the establishment of a vibrant, mixed use town centre that provides a focus for the community, offering convenient access to a range of shopping, local employment and services as well as unique, well designed civic spaces and community and cultural facilities. The town centre is supported by two lower order local centres conveniently located to provide for the day to day needs of residents.
- (9) Development in the Master Planned Area provides opportunities for a variety of local jobs to be provided making a contribution to improved levels of self containment within the Palmview and Sippy Downs communities. A small Local Employment Area located to the south of the Palmview town centre provides a range of low impact industry and service industry uses and complementary business and commercial uses. Businesses do not rely on direct access or frontage to the Bruce Highway for their viability.
- (10) Development in the Master Planned Area supports the establishment of a culture of sustainable transport use. This is reflected in high patronage of public transport, cycle ways and pedestrian paths. These connections provide convenient access to employment, retail, business, education, recreation, sporting, cultural and health facilities. The keystone of this network is a high quality, integrated public transport system which provides convenient access to the Sippy Downs Town Centre, the University of the Sunshine Coast, the Kawana Town Centre and the Sunshine Coast University Hospital. Improved public transport outcomes respond to the major challenges posed by climate change and peak oil by reducing car dependency whilst also minimising traffic impacts on existing developed areas.

10.3.2.5 Strategic Outcome 2 – Intent for Preferred Dominant Land Use Areas

10.3.2.5.1 Residential Area Intent

Development in the Master Planned Area provides for the Residential Area to be developed as a series of high quality integrated residential neighbourhoods offering a diverse mix of generally low-medium rise and density accommodation ranging from dwelling houses to multiple dwellings in various configurations. Whilst a broad range of housing options are intended to be established within the Residential Area it is anticipated that more intensive residential development occur in locations immediately surrounding the District Activity Centre Area.

10.3.2.5.2 District Activity Centre Area Intent

Development in the Master Planned Area provides for the District Activity Centre Area to be developed as a high quality district level town centre for the Master Planned Area providing a range of retail, business and commercial, entertainment and community facilities in conjunction with more intensive residential development. The District Activity Centre Area is intended to be the most concentrated urban setting in the Master Planned Area and is intended to incorporate a traditional street fronting main street layout, a town park, civic plazas and the main transit station as significant structural elements.

10.3.2.5.3 Local Activity Centre Area Intent

Development in the Master Planned Area provides for each Local Activity Centre Area to be developed as a high quality local level centre (not full service) that provides for the convenience retail, local service and community needs of one or a small cluster of neighbourhoods. Each Local Activity Centre (not full service) is intended to incorporate a street fronting main street layout with active pedestrian edges and surveillance from residential uses.

10.3.2.5.4 Local Employment Area Intent

Development in the Master Planned Area provides for the Local Employment Area to be developed as a high quality local employment area that complements the District Activity Centre Area and primarily services the community of Sippy Downs and Palmview. The Local Employment Area is intended to accommodate a range of low impact industry and service industry uses and complementary business and commercial uses where retail uses are of a limited gross floor area and is to be established as an attractive, small scale local employment area.

10.3.2.5.5 Major Urban Open Space Area Intent

Development in the Master Planned Area provides for the Major Urban Open Space Area to be developed for a range of public sport and recreation parks required to service the needs of the Palmview community in the Master Planned Area and the broader community of the region. Where practicable and compatible with sport and recreational functions, it is intended that ecologically important areas within the Major Urban Open Space Area be protected and rehabilitated.

10.3.2.5.6 Environmental Open Space Area Intent

The Environmental Open Space Area provides for the protection, rehabilitation, buffering and reconnection of native remnant and regrowth vegetation, wetlands, waterways and other ecologically important areas. The Environmental Open Space Area is an extensive area intended to be included in nature conservation or other protective public tenure. The Environmental Open Space Area is not intended to be developed for urban purposes, other than the infrastructure identified on the structure plan maps.

10.3.2.5.7 Scenic Amenity and Highway Acoustic Buffer Intent

Development in the Master Planned Area provides for the protection of the Scenic Amenity and Highway Acoustic Buffer as a non-urban land area that maintains the appearance of natural and landscape separation between urban communities, protects the visual amenity of the Bruce Highway as a scenic route with a natural

and rural edge and protects the amenity of the future Palmview community. It is intended that the Scenic Amenity and Highway Acoustic Buffer accommodate only a limited range of non-urban uses compatible with the rural and natural landscape character of the land surrounding the Master Planned Area.

10.3.2.5.8 Community Facilities Area Intent

Development in the Master Planned Area provides for the Community Facilities Area to be developed to primarily service the needs of the Palmview community in the Master Planned Area. The Community Facilities Area includes land for public and private educational establishments and other major public purposes. It is intended that land included in the Community Facilities Area will be reserved and developed for its intended purposes and that the land will accommodate all associated servicing functions required for the facilities to be able to operate. eg. bus drop-off/set down areas and parking areas.

10.3.2.6 Strategic Outcome 3 – Land Use Structure

- (1) Development in the Master Planned Area recognises and strengthens the importance of the existing and emerging relationships between the Sippy Downs Town Centre, the University of the Sunshine Coast, the Kawana Town Centre, the Sunshine Coast University Hospital and the Master Planned Area as identified conceptually on Other Plans Map OPM P1 (Palmview Master Planned Area and Regional Context) in order to significantly advance self containment and the creation of sustainable communities for the central Sunshine Coast. In particular this will be achieved through the following:-
 - (a) providing an integrated transport network effectively linking Palmview to the key nodes of the Sippy Downs Town Centre, the University of the Sunshine Coast, the Kawana Town Centre and the Sunshine Coast University Hospital;
 - (b) providing a diverse range of housing and affordable living opportunities in close proximity to these key nodes;
 - (c) protecting and reinforcing the significant environmental and landscape values that separate these key nodes and that are required to be maintained as part of the non-urban and urban open space infrastructure networks which frame and define their boundaries.
- (2) Development in the Master Planned Area for urban purposes, other than the limited infrastructure identified on the structure plan maps, does not occur:-
 - (a) on land inundated by the defined flood event which is not suitable to be filled for inclusion as land for urban purposes as specifically identified on **Other Plans Map OPM P2(a) (Palmview Master Planned Area Flood Prone Land)**; or
 - (b) in an ecologically important area as specifically identified on Other Plans Map OPM P2(b) (Palmview Master Planned Area Ecologically Important Areas);

in order to ensure the following:-

- (c) minimise development of flood prone land, except in respect to those areas that have been identified as being required for development so that land use and infrastructure can be configured to achieve an optimal transit oriented development outcome for the Master Planned Area²¹;
- (d) minimise changes to the flood characteristics in the Mooloolah River catchment;
- (e) protect and rehabilitate ecologically important areas and reinforce ecological connections between the Mooloolah River National Park, the Palmview Conservation Park, the Birtinya Wetlands and the Mooloolah River and Sippy Creek riparian corridors and otherwise preserve the functions of the non-urban open space infrastructure network;
- (f) provide for the establishment of a scenic amenity and highway acoustic buffer that maintains the appearance of the natural and landscape separation between urban communities, protects the visual amenity of the Bruce Highway as a scenic route with a natural and rural edge and protects the amenity of the future Palmview community;
- (g) avoid or mitigate the adverse impacts of further significant development for urban purposes on the coastal plain.
- (3) Development in the Master Planned Area provides for the following:-
 - (a) the establishment of a transit oriented community that meets best practice standards for affordable and sustainable urban development and infrastructure;

Jart 10

In preparing the Palmview Structure Plan, Council has determined that incorporating a limited area of land inundated by the defined flood event in the land suitable for urban development, so as to achieve an optimal transit oriented development outcome for the Master Planned Area, does satisfy an overriding need in the public interest in that:-

⁽a) it would result in a significant overall benefit for a significant part of the community in social, economic or environmental terms; and

⁽b) the benefit cannot otherwise be satisfied by other land that is suitable and reasonably available.

- (b) a movement network which creates a high degree of accessibility and permeability and which prioritises pedestrians, cyclists and public transport over private vehicle use;
- (c) an extensive and integrated network of non-urban and urban open space, community facilities infrastructure and other public spaces.
- (4) Development in the Master Planned Area complies with the land use structure identified conceptually on Other Plans Map OPM P3 (Palmview Master Planned Area Land Use Structure) that incorporates the following preferred dominant land use areas:-
 - (a) the Residential Area;
 - (b) the District Activity Centre Area;
 - (c) the Local Activity Centre Area;
 - (d) the Local Employment Area;
 - (e) the Major Urban Open Space Area;
 - (f) the Environmental Open Space Area;
 - (g) the Scenic Amenity and Highway Acoustic Buffer;
 - (h) the Community Facilities Area.
- (5) Development in the Master Planned Area:-
 - (a) is limited to the capacity of existing and planned infrastructure networks as identified conceptually and in part only on **Other Plans Map OPM P4 (Palmview Master Planned Area Infrastructure Elements)**:
 - (b) provides for and otherwise does not compromise the existing and planned infrastructure networks as identified conceptually and in part only on **Other Plans Map OPM P4 (Palmview Master Planned Area Infrastructure Elements)**; and
 - (c) occurs in a sequenced and orderly manner that provides for the most efficient and effective provision of this infrastructure in the public interest.
- (6) Development in the Master Planned Area is limited to the development entitlements specifically identified on Other Plans Map OPM P5 (Palmview Master Planned Area Development Entitlements) upon which the infrastructure arrangements are based.

10.3.2.7 Strategic Outcome 4 – Open Space

- (1) Development in the Master Planned Area provides for the establishment of an integrated non-urban open space infrastructure network which:-
 - (a) frames the edges of and separates urban areas within the Master Planned Area from other urban communities:
 - (b) provides for the protection, enhancement, buffering and reconnection of ecologically important areas including the Mooloolah River National Park, the Palmview Conservation Park, the Birtinya Wetlands and the Mooloolah River and Sippy Creek riparian corridors;
 - (c) builds ecosystem condition, resilience and capacity to evolve and adapt to environmental change including climate change and to absorb impacts resulting from development;
 - (d) provides for large areas of un-fragmented land to be set aside for ecological protection and enhancement to sustain plant and animal populations, biological processes and ecosystem viability:
 - (e) provides for the protection of protected and threatened communities and species and enhances their habitat, including wildlife corridors and connectivity to improve species recovery;
 - (f) protects water quality (including surface water and ground water) within the Mooloolah River and its tributaries and accommodates elements of stormwater conveyance and treatment that are appropriate within an ecological setting;
 - (g) provides for the management of threatening processes including impacts from development, climate change, invasive species and edge effects;
 - (h) provides for the protection of important landscape and scenic amenity values;
 - (i) provides the community with a range of low impact environmental recreation and educational opportunities and outdoor experiences compatible with the protection of ecological values; and
 - (i) effectively integrates with the urban open space infrastructure network.
- (2) Development in the Master Planned Area provides for the establishment of an integrated urban open space infrastructure network which:-
 - (a) provides accessible, functional and appealing urban parks which deliver a diversity of highly
 accessible sporting, recreational and leisure opportunities that reinforce a community sense of
 place and contribute to the liveability of urban areas and the health and wellbeing of the community;

- (b) protects and enhances ecologically important areas which are contained within the urban open space infrastructure network:
- (c) protects water quality including surface and ground water within the Mooloolah River and its tributaries; and
- (d) effectively integrates with and protects the non-urban open space infrastructure network.
- (3) Development in the Master Planned Area provides for:-
 - (a) the non-urban open space infrastructure network specifically identified on Other Plans Map OPM P4 (Palmview Master Planned Area Infrastructure Elements) that incorporates the following:-
 - (i) the environmental protection area, that contains land with the highest in-situ environmental value:
 - (ii) the environmental enhancement area, that represents the best opportunities for reconnection of the environmental protection area and other ecologically important areas outside the Master Planned Area and that are intended to be a primary location for ecological rehabilitation;
 - (iii) the environmental transition area, that provides separation and buffering for environmental protection areas and environmental enhancement areas from the sources of environmental impact and protects important habitat corridors;
 - (iv) ecological rehabilitation works and embellishments in the environmental protection area, the environmental enhancement area and the environmental transition area:
 - (v) the scenic amenity and highway acoustic buffer which maintains the appearance of the natural and landscape separation between urban communities, protects the visual amenity of the Bruce Highway as a scenic route with a natural and rural edge and protects the amenity of the future Palmview community.
 - (b) the urban open space infrastructure network identified conceptually and in part only on **Other Plans Map OPM P4 (Palmview Master Planned Area Infrastructure Elements)** that incorporates the following:-
 - (i) land for a town square and transit plaza adjacent to the major transit station in the District Activity Centre:
 - (ii) land for regional, district and local sports and recreation parks;
 - (iii) land for green boulevards that provide strong pedestrian and bicycle connections to and between elements of urban open space infrastructure, non-urban open space infrastructure and community facilities infrastructure;
 - (iv) embellishments in addition to land for urban open space infrastructure.

10.3.2.8 Strategic Outcome 5 – Character and Identity

- (1) Development in the Master Planned Area maintains and enhances key elements of the area's existing and planned character and identity comprising the following:-
 - (a) the scenic amenity and highway acoustic buffer as specifically identified on Other Plans Map OPM P4 (Palmview Master Planned Area Infrastructure Elements) which maintains the appearance of the natural and landscape separation between urban communities, protects the visual amenity from the Bruce Highway as a scenic route with a natural and landscape edge and protects the amenity of the future Palmview community²²; and
 - (b) the landscape values contained in and associated with the Mooloolah River National Park, the Palmview Conservation Park, the Birtinya Wetlands and the Mooloolah River and Sippy Creek riparian corridors.
- (2) Development in the Master Planned Area provides for the establishment of quality urban places that:-
 - reflect appropriate responses to the landscape setting, local climatic influences and the community's preference for a lifestyle based on outdoor experiences;
 - (b) incorporate integrated streetscape and public place design and art that contribute to a sense of place and community identity; and
 - (c) are accessible and legible to bicycle and pedestrian use.

10.3.2.9 Strategic Outcome 6 – Residential Development

(1) Development in the Master Planned Area provides for:-

The scenic amenity and highway acoustic buffer as specifically identified on **Other Plans Map OPM P4 (Palmview Master Planned Area Infrastructure Elements)** has a design width of 80 metres measured from the eastern boundary of the Bruce Highway Road Corridor proposed widening.

- (a) an estimated minimum of 6,589 dwellings to be established in the Master Planned Area; and
- (b) a maximum of 6,937 dwellings to be established in the Master Planned Area.
- (2) Development in the Master Planned Area provides for residential uses that are designed to support high levels of walking, cycling and public transport use.
- (3) Development provides for an average net residential density of at least 18 dwellings per hectare to be achieved for urban areas within the Master Planned Area with the highest density of residential development located within and immediately surrounding the Palmview District Activity Centre and local activity centres so as to facilitate transit oriented development and provide high levels of access to infrastructure and services.
- (4) Development in the Master Planned Area provides a wide range of appropriately located and designed housing types to meet the needs of the future community, contribute to housing affordability and promote affordable living.
- (5) Development in the Master Planned Area provides for the development of a series of high quality, interconnected, walkable and transit supportive residential neighbourhoods.

10.3.2.10 Strategic Outcome 7 – Centres and Employment

- (1) Development in the Master Planned Area supports and is consistent with the Sunshine Coast Activity Centres Network.
- (2) Development in the Master Planned Area provides for the Sippy Downs Town Centre to be established as the primary Major Regional Activity Centre servicing the communities of Sippy Downs and the urban areas within the Master Planned Area.
- (3) Development in the Master Planned Area provides for the District Activity Centre to:-
 - (a) be established as a district level centre only, providing a range of retail, business and commercial, entertainment and community facilities in conjunction with more intensive residential uses:
 - (b) have a maximum gross floor area (GFA) for all business and commercial uses of not more than 15,000m²;
 - (c) be located in a central location within the Master Planned Area adjacent to the public transport corridor and the dedicated bicycle and pedestrian corridor;
 - (d) be based upon a 'main street' and 'traditional town centre' layout and design with street fronting retail layouts instead of enclosed or parking-lot dominant retail formats:
 - (e) incorporate attractive, high amenity public areas at locations that encourage and support social interaction and casual meeting; and
 - (f) incorporate principles of sustainable and sub-tropical building design.
- (4) Development in the Master Planned Area provides for the District Activity Centre to be complemented by two Local Activity Centres (not full service) that:-
 - (a) fulfil the convenience retail, local service and community needs of one or a small cluster of neighbourhoods only; and
 - (b) have a maximum gross floor area (GFA) of not more than 2,500m² each.
- (5) Development in the Master Planned Area provides for all activity centres to achieve the following:-
 - (a) be located in such a way as to achieve a high level of integration with public transport infrastructure, the transit plaza, town square, and open space infrastructure;
 - (b) be located centrally within neighbourhoods in order to maximise opportunities to create walkable catchments:
 - (c) be based upon a main street design with street fronting retail layouts instead of enclosed or parking-lot dominant retail formats:
 - incorporate attractive, high amenity public areas at locations that encourage and support social interaction and casual meeting; and
 - (e) incorporate principles of sustainable and sub-tropical building design.
- (6) Development in the Master Planned Area provides for the Local Employment Area to:-

- (a) be established as a local employment area, primarily servicing the communities of Sippy Downs and Palmview and accommodating a range of low impact industry and service industry uses and complementary business and commercial uses;
- (b) have a maximum gross floor area (GFA) of not more than 20,000m².
- (c) not duplicate the range of services planned to be established within the District Activity Centre or the Sippy Downs Town Centre.

10.3.2.11 Strategic Outcome 8 – Integrated Transport

- (1) Development in the Master Planned Area is serviced by an integrated transport infrastructure network which supports transit oriented development, prioritises and promotes pedestrian, cycle and public transport modes over private vehicle use and connects the Master Planned Area to the regional transport network.
- (2) Development in the Master Planned Area provides for the integrated transport network identified conceptually and in part only on **Other Plans Map OPM P4 (Palmview Structure Plan Infrastructure Elements)** that incorporates the following:-
 - (a) an integrated transport network effectively linking the Palmview District Activity Centre to the Sippy Downs Town Centre, the Kawana Town Centre, the University of the Sunshine Coast and the Sunshine Coast University Hospital:
 - (b) an extensive and highly permeable network of local bicycle and pedestrian paths linking residential neighbourhoods with key urban open space and non-urban open space infrastructure, community facilities infrastructure and services and activity centres;
 - (c) local bus loops servicing the Master Planned Area and Sippy Downs communities and providing internal and external transit connections;
 - (d) the major north-south road and public transport link connecting Claymore Road to Caloundra Road and to the Caloundra City Centre, the Sunshine Coast Business and Industrial Park and the planned Caloundra South urban community;
 - (e) the planned and appropriately sequenced connection of the Master Planned Area to Springhill Drive to ensure no adverse impact on the effectiveness or efficiency of this road;
 - a highly permeable internal local road network which provides for local traffic circulation and servicing;
 - (g) the establishment of fauna fencing and fauna crossing treatments to allow for controlled fauna movement in the Master Planned Area.
- (3) Development in the Master Planned Area is not directly connected to and is not dependent upon access to the Bruce Highway. Indirect access to the Bruce Highway via a future western service road is only to be provided once the western service road is provided as part of future upgrading of the Bruce Highway road corridor.
- (4) Development in the Master Planned Area provides for through traffic to be directed to higher order roads that traverse the Master Planned Area so as to maintain high levels of amenity for neighbourhoods within and immediately adjacent to the Master Planned Area.

10.3.2.12 Strategic Outcome 9 – Community Wellbeing

- (1) Development in the Master Planned Area provides for the development of an accessible, inclusive, cohesive, interactive, safe and healthy community that:-
 - (a) is provided with a range of community facilities infrastructure and services to meet the needs of the community;
 - (b) has access to a network of community gathering spaces that are connected to activity centre, urban open space infrastructure, non-urban open space infrastructure, community facilities infrastructure and services, public transport infrastructure and bicycle and pedestrian infrastructure;
 - (c) protects sites, places and areas of indigenous cultural heritage significance;
 - (d) incorporates the principles of crime prevention through environmental design and universal design;
 - (e) has neighbourhoods that incorporate affordable housing and promote affordable living.
- (2) Development in the Master Planned Area provides for the community facilities infrastructure network identified conceptually and in part only on **Other Plans Map OPM P4 (Palmview Master Planned Area Infrastructure Elements)** that incorporates the following:-
 - (a) land for educational facilities;
 - (b) land for local government district and local community facilities including a branch library, community and neighbourhood centres and meeting spaces;

- (c) land for a local government depot;
- (d) land for an Energex substation.

10.3.2.13 Strategic Outcome 10 – Infrastructure

- (1) Development in the Master Planned Area provides for other infrastructure networks identified conceptually and in part only on **Other Plans Map OPM P4 (Palmview Master Planned Area Infrastructure Elements)** that incorporate the following:-
 - (a) integrated water management infrastructure;
 - (b) electricity infrastructure.
- (2) Development in the Master Planned Area provides for integrated water management infrastructure comprising water supply infrastructure, sewer infrastructure and stormwater infrastructure that enable sustainable and innovative management of water, waste, energy and other natural resources.
- (3) Development in the Master Planned Area provides for the establishment of high quality and reliable telecommunications infrastructure network to homes, businesses and community buildings.
- (4) Development in the Master Planned Area provides for infrastructure and services which are designed and constructed as follows:-
 - (a) to comply with and not otherwise compromise the planned infrastructure networks and hierarchies;
 - (b) to be co-located, where reasonably practicable, with other infrastructure networks;
 - (c) to minimise the overall life cycle costs of the infrastructure and the network;
 - (d) to achieve a high level of environmental performance;
 - (e) to achieve the desired standards of service;
 - (f) to be provided ahead of or in conjunction with the staging of development.

10.3.2.14 Strategic Outcome 11 – Ecological Sustainability and Environmental Management

- (1) Development in the Master Planned Area occurs in a manner that minimises its ecological footprint and reflects the principles of ecologically sustainable development, by:-
 - (a) establishing the non-urban open space infrastructure network and the urban open space infrastructure network;
 - (b) maximising opportunities for the use of bicycle, pedestrian and public transport modes;
 - (c) minimising energy consumption and promoting the use of renewable energy sources;
 - (d) minimising water consumption through re-use, use of alternative sources and demand reduction
 - (e) protecting amenity, including impacts from air, noise and light pollution;
 - (f) minimising land degradation;
 - (g) protecting biodiversity;
 - (h) protecting water quality including surface and ground water in the Mooloolah River National Park, the Palmview Conservation Park, the Birtinya Wetlands and the Mooloolah River and Sippy Creek riparian corridors and accommodating elements of stormwater management that are appropriate to its environmental or urban setting;
 - (i) using materials that promote the sustainable use of resources:
 - (j) minimising the amount of waste generated from all sources;
 - (k) maintaining natural regimes for groundwater flow rates, balance and chemistry; and
 - (I) preventing creation of artificial waterbodies other than those required primarily for stormwater quality treatment.
- (2) Development for excavation and filling in the Master Planned Area, other than where required to establish the limited infrastructure identified on the structure plan maps, does not occur:-
 - (a) on land inundated by the defined flood event which is not suitable to be filled for inclusion as land for urban purposes as specifically identified on **Other Plans Map OPM P2(a) (Palmview Master Planned Area Flood Prone Land)**; or
 - in an ecologically important area as specifically identified on Other Plans Map OPM P2(b)
 (Palmview Master Planned Area Ecologically Important Areas);

in order to:-

- (c) prevent a loss of flood storage;
- (d) prevent a loss of or change to surface and ground water flow paths;
- prevent acceleration or retardation of flows; (e)
- prevent any reduction in flood warning times elsewhere in the floodplain; (f)
- (g)
- prevent potential damage to property; prevent adverse environmental impacts as a result of changes in flood characteristics; (h)
- avoid disturbance of acid sulfate soils; (i)
- (j) protect the environmental characteristics of sensitive downstream waterways and wetland ecosystems; and
- protect the function of essential infrastructure and services existing or planned for the Master (k) Planned Area.

10.3.3 Master Planned Area Precincts and Sub-Precincts

10.3.3.1 Introduction

This section specifies the following:-

- (1) the precincts and sub-precincts into which the Master Planned Area is divided;
- (2) the level of assessment of development in the Master Planned Area;
- (3) the assessment criteria for development being the following:-
 - (a) applicable codes for self assessable development and development requiring code assessment in the Master Planned Area:
 - (b) the provisions of the *Sunshine Coast Planning Scheme* applicable to the Master Planned Area for development requiring impact assessment in the Master Planned Area.

10.3.3.2 Division of Master Planned Area into Precincts and Sub-precincts

The Master Planned Area is divided into the precincts and sub-precincts specified in **Table 10.3.3.2 (Structure Plan Area Precincts and Sub-precincts)** as specifically identified on **Other Plans Map OPM P7 (Palmview Master Planned Area Precincts and Sub-precincts)**.

Table 10.3.3.2 Master Planned Area Precincts and Sub-precincts

	precinct
	Landscape Protection and Enhancement Sub-precinct

10.3.3.3 Tables of Assessment

10.3.3.3.1 Tables of Assessment Generally

- (1) The Tables of Assessment regulate development being a material change of use, reconfiguring a lot, building work and operational work.
- (2) The Tables of Assessment identify whether development is exempt, self assessable, assessable development requiring code assessment or assessable development requiring impact assessment.
- (3) For development being a material change of use, the Tables of Assessment also identify whether a use is:-
 - (a) a consistent use being a use that is consistent with the intent for the precinct and intended to occur within the precinct;
 - (b) an inconsistent use being a use that is inconsistent with the intent for the precinct and not intended to occur within the precinct.
- (4) The Tables of Assessment also identify the following:-
 - (a) applicable codes for development requiring self assessment and code assessment;
 - (b) the provisions of the *Sunshine Coast Planning Scheme* applicable to the Master Planned Area for development requiring impact assessment.
- (5) The Tables of Assessment are listed in Table 10.3.3.3A (Development Type and Tables of Assessment).

Column 1 Sub-section	Column 2 Development Type	Column 3 Table of Assessment

Column1	Column 2	Column 3
Development	Level of Assessment	Assessment Criteria
Creating an Easement for the purposes of giving access to a lot from a constructed road or for providing infrastructure associated with the development of the Palmview Master Planned Area.	Code assessable	Palmview structure plan area code Reconfiguring a lot code Transport and parking code Works, services and infrastructure code
Rearranging Boundaries of a Lot	Code assessable	Palmview structure plan area code Reconfiguring a lot code Landscaping code Nuisance code Stormwater management code Transport and parking code Works, services and infrastructure code

Note:-

- 1. Reconfiguring a lot involving the creation of a lot by subdividing another lot of premises is:
 - (a) code assessable if the premises is the subject of a preliminary approval to which section 242 of the Act applies for a material change of use of the premises or a development application or a development application for a preliminary approval to which section 242 of the Act applies for a material change of use of the premises; or
 - (b) impact assessable if paragraph (a) does not apply.
- Under section 899 of the Act, the notification stage of IDAS does not apply to a development application for preliminary approval to which section 242 applies if the development for which the application is made is substantially consistent with:
 - (a) the structure plan area code identified or included in the structure plan for the area;
 - (b) any master plan area code included in a master plan that applies to land or part of the land in the area; and
 - (c) the application does not seek to change the type of assessment for the development or, if it does, it seeks to change it in a way mentioned in section 295(3)(b) of the Act.

10.3.4 Palmview Structure Plan Area Code

10.3.4.1 Introduction

- (1) This section provides the Palmview structure plan area code for the Master Planned Area.
- (2) The Palmview structure plan area code contains the following:-
 - (a) overall outcomes which constitute the purpose of the code and specify the desired outcomes for the following:-
 - (i) the whole of the Master Planned Area;
 - (ii) particular precincts and sub-precincts;
 - (iii) infrastructure and services;
 - (b) performance outcomes that contribute to the achievement of the overall outcomes;
 - (c) acceptable outcomes for assessable development requiring code assessment;
 - (d) acceptable outcomes for self assessable development (as indicated by an 's').
- (3) The following structure plan maps spatially represent elements of the Palmview structure plan area code:-
 - (a) Other Plans Map OPM P2(a) (Palmview Master Planned Area Flood Prone Areas);
 - (b) Other Plans Map OPM P2(b) (Palmview Master Planned Area Ecologically Important Areas);
 - (c) Other Plans Map OPM P3 (Palmview Master Planned Area Land Use Structure);
 - (d) Other Plans Map OPM P5 (Palmview Master Planned Area Development Entitlements);
 - (e) Other Plans Map OPM P6 (Palmview Master Planned Area Precincts and Sub-precincts);
 - (f) Other Plans Map OPM P7 (Palmview Master Planned Area Development and Transport Infrastructure Network Sequencing);
 - (g) Other Plans Map OPM P8 (Palmview Master Planned Area Road Transport Infrastructure Network);
 - (h) Other Plans Map OPM P9 (Palmview Master Planned Area Public Transport Infrastructure Network);
 - (i) Other Plans Map OPM P10 (Palmview Master Planned Area Bicycle and Pedestrian Infrastructure Network);
 - (j) Other Plans Map OPM P11 (Palmview Master Planned Area Urban Open Space Infrastructure Network);
 - (k) Other Plans Map OPM P12 (Palmview Master Planned Area Non-urban Open Space Infrastructure Network);
 - (I) Other Plans Map OPM P13 (Palmview Master Planned Area Community Facilities Infrastructure Network);
 - (m) Other Plans Map OPM P14 (Palmview Master Planned Area Electricity Infrastructure Network).
- (4) The Palmview structure plan area code applies to self assessable and assessable development in the Master Planned Area.

10.3.4.2 Overall Outcomes for the whole of the Master Planned Area

- (1) Development in the Master Planned Area for urban purposes other than the infrastructure identified on the structure plan maps does not occur:-
 - (a) on land inundated by the defined flood event which is not suitable to be filled for inclusion as land for urban purposes as specifically identified on **Other Plans Map OPM P2(a) Palmview Master Planned Area Flood Prone Land)**; and
 - (b) in an ecologically important area as specifically identified on Other Plans Map OPM P2(b) Palmview Master Planned Area Ecologically Important Areas).
- (2) Development in the Master Planned Area is consistent with the intent for the relevant precinct and subprecinct in which the development is proposed to occur.
- (3) Development in the Master Planned Area does not involve a use identified as being an inconsistent use for the precinct or sub-precinct in which the development is proposed to occur.
- (4) Development in the Master Planned Area does not exceed the development entitlements specifically identified on Other Plans Map OPM P5 (Palmview Master Planned Area Development Entitlements).

- (5) Development in the Master Planned Area is carried out in accordance with the sequence identified conceptually on Other Plans Map OPM P7 (Palmview Master Planned Area Development and Transport Infrastructure Network Sequencing) or an alternative sequence included in an infrastructure arrangement applicable to the land the subject of the development.
- (6) Development in the Master Planned Area contributes to housing affordability and promotes affordable living.
- (7) Development in the Master Planned Area provides a high level of accessibility to local employment, educational facilities, business and community facilities, public transport, open space and recreation and other facilities and does not adversely impact on the amenity of surrounding residential areas, the integrated transport network and public safety.
- (8) Development in the Master Planned Area prioritises pedestrian, bicycle and public transport over private vehicle use.
- (9) Development in the Master Planned Area meets best practice standards for sustainability.
- (10) Development in the Master Planned Area incorporates a high standard of urban design and landscaping.
- (11) Development in the Master Planned Area incorporates the principles of crime prevention through environmental design and universal design.
- (12) Development in the Master Planned Area incorporates an integrated water management system that:-
 - (a) ensures impacts upon surface and ground water quality are avoided; and
 - (b) maintains water balance and chemistry.

10.3.4.3 Performance Outcomes and Acceptable Outcomes for the whole of the Master Planned Area

		Performance Outcomes	appli	eptable Outcomes (denoted as ^{'s} where icable to self assessable development)
Regiona	al Con	text, Settlement Pattern Structure and	Ultimate F	Population
PO1	deverse deverse development de	form, pattern and structure of elopment in the Master Planned Area orgnises the role and context of the ster Planned Area in the region through following: providing a diverse range of housing and affordable living opportunities for students, workers and families in close proximity to the University of the Sunshine Coast, the Sunshine Coast University Hospital, the Sippy Downs	AO1	No acceptable outcome provided.
	(b)	Town Centre and the Kawana Town Centre;		
		connecting the Master Planned Area to the Sippy Downs Town Centre, the University of the Sunshine Coast, the Kawana Town Centre and the Sunshine Coast University Hospital;		
	(c)			
	(d)			

	Performance Outcomes	eptable Outcomes (denoted as s where
	the non-urban and urban open space infrastructure networks.	 licable to self assessable development)
PO2	The form, pattern and structure of development provides for the establishment of a transit oriented community with the following characteristics:- (a) a compact urban form with strongly defined edges which protect important ecological and landscape values; (b) a mix of land uses in a configuration and at a density that promotes local self containment, supports the provision of a high quality public and active transport network and results in reduced dependency on private vehicle use;	No acceptable outcome provided.
	 (c) a wide range of housing options including different dwelling sizes and types that meet the needs of a range of household types and population groups; (d) high levels of access and connectivity to local employment, business and community services, public transport, open space and recreation and other 	
	facilities; (e) high quality sub-tropical and sustainable design that maximises amenity, street activity, pedestrian connectivity and environmental performance.	
PO3	Development provides for a maximum of 6,937 dwellings to be established within the Master Planned Area.	No acceptable outcome provided.
Ecoloa	ical and Landscape Protection ²⁵	
PO4	Development for urban purposes, other than the infrastructure identified on the structure plan maps avoids the following areas:- (a) land inundated by the defined flood event which is not suitable to be filled for inclusion as land for urban purposes as specifically identified on Other Plans Map OPM P2(a) (Palmview Master Planned Area Flood Prone Land); (b) ecologically important areas as specifically identified on Other Plans Map OPM P2(b) (Palmview Master Planned Area Ecologically Important Areas); (c) the scenic amenity and highway acoustic buffer as specifically identified on Other Plans Map OPM P12 (Palmview Master Planned Area Non-urban Open Space Infrastructure Network).	No acceptable outcome provided.
PO5	Development provides for the ecological and landscape protection and rehabilitation of the non urban open space infrastructure network in accordance with the following:- (a) Table 10.3.4.3A (Outcomes for Non-	No acceptable outcome provided.

The Planning Scheme Policy for the Palmview Structure Plan provides further standards for and guidance about the achievement of ecological and landscape protection outcomes.

	Performance Outcomes	Acceptable Outcomes (denoted as 's' where applicable to self assessable development)
	urban Open Space Infrastructure	
	Area);	
	(b) Table 10.3.4.3B (Palmview Ecological and Landscape	
	Protection and Rehabilitation	
	Landscape Units).	
PO6	Development provides for an environmental offset for the area of an ecologically	
	important area specifically identified on	
	Other Plans Map OPM P2(b) (Palmview	
	Master Planned Area Ecologically	
	Important Areas) that is adversely impacted by the provision of infrastructure	
	for the Master Planned Area in accordance	
	with the following:-	
	(a) the minimum standards specified in Table 10.3.4.3C (Environmental	
	Offset Requirements);	
	(b) an environmental offset is to be	
	provided either within or outside the	
	Master Planned Area, but is not to include land already specifically	
	identified as non-urban open space on	
	Other Plans Map OPM P12	
	(Palmview Master Planned Area Non-urban Open Space	
	Infrastructure);	
	(c) where an environmental offset is to be	
	provided outside the Master Planned Area, the environmental offset area is	
	to have a nexus with the Master	
	Planned Area (e.g. the offset area is	
	provided within the downstream	
	catchment or within a habitat corridor associated with the Master Planned	
	Area) and is to be consolidated rather	
	than isolated;	
	 (d) an environmental offset is not to be used for any material or commercial 	
	gain in relation to carbon sequestration	
	unless the planting for 'additionality'26	
	has been considered and the Council has agreed to its use for carbon	
	sequestration;	
	(e) an environmental offset is to be the	
	responsibility and liability of the owner	
	on which the development to which the environmental offset relates is being	
	carried out although the owner may	
	make a contractual arrangement with a	
	third party (i.e. private contractor, registered environmental charity or	
	public sector entity) to carry out all or	
	part of the environmental offset,	
	subject to satisfactory demonstration	
	that the ecological and landscape protection outcomes are met;	
	(f) the costs of management and	
	maintenance are to form part of the	
	environmental offset and where it is proposed to transfer enduring	
	management responsibility to another	

^{&#}x27;additionality' refers to the determination of whether the offset activity would have occurred in the absence of the offset program or according to a business as usual scenario.

	Performance Outcomes	Acc	eptable Outcomes (denoted as ^{'s'} where
			icable to self assessable development)
	party, the completion criteria and financial bonding is to be agreed with the Council in an infrastructure agreement; (g) an environmental offset does not apply where an environmental offset requirement has been approved under Federal and/or State Government legislation for the clearing or otherwise disturbance of the subject area; (h) an environmental offset is to:- (i) be used as a last resort only and not as a reward for poor environmental performance; (ii) address both a direct offset ²⁷ and a contributing offset ²⁸ ; (iii) offer "like for like or better" or as close as practicable to "like for like" in terms of environmental values, vegetation habitat, species, ecosystem, landscape, hydrology and physical area; (iv) provide additional protection to environmental values at risk or additional management actions to improve environmental values; (v) be based upon a robust and consistent assessment process; (vi) be clearly defined, transparent and enforceable; (vii) demonstrate security of purpose, tenure and management; (viii) result in a net environmental benefit; and	аррі	icable to self assessable development)
P07	(ix) satisfy all statutory requirements. Development protects and enhances the environmental protection area specifically identified on Other Plans Map OPM P12 (Palmview Master Planned Area Non-urban Open Space Infrastructure Network).	A07	No acceptable outcome provided.
PO8	Development provides for the ecological rehabilitation of the environmental enhancement area specifically identified on Other Plans Map OPM P12 (Palmview Master Planned Area Non-urban Open Space Infrastructure Network) in order to reconnect isolated patches of remnant vegetation, support wildlife corridors and actively assist the process of natural regeneration.	AO8	No acceptable outcome provided.
PO9	Development provides for the environmental transition area specifically identified on Other Plans Map OPM P12 (Palmview Master Planned Area Non-urban Open Space Infrastructure Network) to be:-	AO9	No acceptable outcome provided.

Direct offsets counterbalance the adverse environmental impact directly with the aim of achieving a 'net environmental outcome'. Direct offsets include restoration or rehabilitation of existing degraded ecosystems, enhancement or re-establishment of ecosystems in areas of low representation or poor condition, re-establishment or enhancement of biodiversity corridors, implementation of species recovery plans and acquisition of land subject to threatening processes and inclusion into a conservation reserve or equivalent legal tenure. Contributing offsets activities should be considered as part of a combined approach with direct offset activities. Contributing offsets include conservation activities (i.e. nature refuge, conservation covenant), protection (i.e. fencing, buffering etc), research, fauna crossings, education, removing threats, or ongoing management activities (such as monitoring, maintenance, preparing management plans, evaluation, reporting).

Perforn	nance Outcomes	Acceptable Outcomes (denoted as 's' where
/a\b = b = b =	ilitated on a buffer to the	applicable to self assessable development)
\ /	ilitated as a buffer to the onmental protection area and	
	onmental enhancement area to	
	e the following:-	
(i) r	maintenance and appropriate	
	buffering of existing vegetation	
	and habitat;	
	maintenance of habitat corridors

barriers to fauna movement across and between ecologically important

	Performance Outcomes		eptable Outcomes (denoted as 's' where icable to self assessable development)
PO14	Development avoids or minimises impacts on biodiversity values as a result of environmental weeds, declared plants, poisonous and noxious plants, pest animals or introduced weed species ²⁹ .	AO14	No acceptable outcome provided.
PO15	Development incorporates landscaping that includes the following elements:- (a) indigenous native plants of local provenance; (b) known food for wildlife and habitat trees and shrubs; (c) replication of adjacent healthy remnant habitats, including understorey vegetation; (d) enhancement of links between existing habitats.	AO15	No acceptable outcome provided.
	mental Resource Management and Natural F		
PO16	Development ensures the following:- (a) acid sulfate soils are not disturbed; (b) where acid sulfate soils are disturbed, works are managed to avoid or minimise the release of acid and metal contaminants.	AO16	Development complies with the Acid Sulfate Soils Overlay Code.
PO17	Development ensures the following:- (a) the risk to public health, from insect borne arboviruses and nuisance caused by biting insects is minimised; (b) the presence or expansion of breeding sites for mosquito larvae is not intensified; (c) new waterbodies and stormwater treatment devices are designed to minimise the potential breeding opportunities of biting insects; (d) mosquito control measures that are designed and implemented so as not to:- (i) affect the ecological integrity of natural wetlands or waterways; and (ii) cause a risk to public health and safety.	A017	No acceptable outcome provided.
PO18	Development minimises the threat of bushfire to life and property and incorporates fire management measures which maintain and enhance biodiversity.	AO18	Development complies with the Bushfire Hazard Overlay Code .
PO19	Development provides for the identification and protection of sites, places and areas having indigenous cultural heritage significance.	AO19	No acceptable outcome provided.
PO20	Development provides for the protection of amenity and minimises impacts from air, noise and light pollution.	AO20	No acceptable outcome provided.
PO21	Development maintains the viability of the Meridan Plains Extractive Resource Area through the following:- (a) avoiding significant land use conflicts; (b) configuring infrastructure associated with the development of the Master Planned Area so as to minimise impacts on the arrangement of extraction areas. Development, including the infrastructure	AO21	No acceptable outcome provided. Development complies with the <i>Flood</i>

No acceptable outcome provided.

Adaptable Housing.

	Performance Outcomes	Acce	eptable Outcomes (denoted as 's' where
	- STOTMANDO GARGONICO		icable to self assessable development)
	especially suited to elderly persons and people with a disability or special need, including independent housing, supported accommodation and residential care.		
PO33	Development provides for an average net residential density of at least 18 dwellings per hectare to be achieved for that part of the Master Planned Area identified as being suitable for urban development and included in an urban precinct being a residential precinct, district ctivity centre precinct, local activity centre precinct, local employment area precinct or community purpose precinct.	A033	Development achieves the minimum average net residential density specified for the precinct or sub-precinct in which the development is located.
PO34	Development responds to the sub-tropical	AO34	
	climate and coastal plain setting through the following:- (a) ensuring a strong presence of nature and water through the following:- (i) orientation to urban and non-urban open space; (ii) retention of significant views to waterways and natural landmarks; (iii) the fostering of tree planting and continuous vegetation; (iv) the incorporation of green walls and rooftop gardens where appropriate; (b) creating an open and permeable built environment through the following:- (i) ensuring a diversity of useable and sheltered outdoor places in a development; (ii) providing opportunities for informality; (iii) promoting access to urban and non-urban open space; (c) incorporating local interpretations of sub-tropical architecture and landscape design.		No acceptable outcome provided.
PO35	Development is designed and operated to minimise the production of greenhouse gas emissions by implementing a range of emission limiting measures including the following: (a) use of solar power or other non-polluting, renewable energy sources to supply part or all of the development's energy needs; (b) use of the energy efficient infrastructure systems.	AO35	No acceptable outcome provided.
	guring a Lot	1000	N
PO36	Development for reconfiguring a lot provides for no new lots, other than lots required to provide the infrastructure identified on the structure plan maps, to be created in the following areas:- (a) land inundated by the defined flood event which is not suitable to be filled for inclusion as land for urban	AO36	No acceptable outcome provided.

The Planning Scheme Policy for the Palmview Structure Plan provides further standards for and guidance about the achievement of subtropical and sustainable design outcomes.

	Performance Outcomes	Acce	eptable Outcomes (denoted as ^{'s'} where
PO37	purposes as specifically identified on Other Plans Map OPM P2(a) (Palmview Master Planned Area Flood Prone Land); (b) ecologically important areas as specifically identified on Other Plans Map OPM P2(b) (Palmview Master Planned Area Ecologically Important Areas).		licable to self assessable development)
P037	Development for reconfiguring a lot provides for a pattern of subdivision that maximises the north-south orientation of lots created for residential uses.	AOS7	No acceptable outcome provided.
Sequenc	ing of Development		
PO38	Development is carried out in accordance with the sequencing of development and the transport infrastructure network specified on Other Plans Map OPM P8 (Palmview Master Planned Area Development and Transport Infrastructure Network Sequencing).	AO38	No acceptable outcome provided.
Buffers t	to Sensitive Land, Incompatible Uses and In	frastructu	ire
PO39	Development provides for lots to be created in locations that:- (a) are adequately buffered to prevent potential adverse impacts on future users of the lots and the adjacent lots; (b) separate the lots from incompatible uses and infrastructure; and (c) do not create 'reverse amenity' situations where the continued operation of existing uses is compromised by the proposed development.	AO39	No acceptable outcome provided.
	Amenity and Noise3132		
PO40	Development that is a sensitive land use is located, designed, constructed and operated to achieve a satisfactory level of acoustic amenity where there is potential for noise emissions generated from surrounding development to adversely affect the sensitive land use.	AO40	The sensitive land use is not established in an area that will be adversely impacted by noise generated by existing land uses, activities and possible future development in the area. OR
	Note:- This performance outcome relates to a 'reverse amenity' situation where a proposed sensitive land use may be adversely impacted by noise emissions from surrounding development. In such cases, it is contigent upon the proposed sensitive land use to implement measures to ensure a satisfactory level of acoustic amenity is provided to prospective occupants and users of the development.		Where located in an area where adverse noise impacts are likely, the sensitive land use mitigates all potential impacts through site layout, design, construction, and operation.
<u>PO41</u>	Development that is a sensitive land use is located, designed, constructed and operated to ensure that the proposed use is not subject to odour, dust or particulate	<u>AO41</u>	No acceptable outcome provided.

Editor's note-the **Planning scheme policy** for nuisance code provides guidance for achieving outcomes of this code, including the preparation of a noise impact assessment report, odour impact assessment report and lighting impact assessment report.

Note-Council will take the order of occupancy of new and existing noise sources into consideration in implementing Performance Outcome PO39 of this code. The intent of this performance outcome is not to require existing lawful uses to control noise emissions in response to encroachment by new noise sensitive development.

	Performance Outcomes		ptable Outcomes (denoted as 's' where cable to self assessable development)
	emissions from surrounding development that would cause environmental nuisance.		
Avoidar	nce of Contaminated Land		
<u>PO42</u>	Development ensures that lots are not created on contaminated land, unless the land is first remediated and declared to be fit for the intended purpose.	<u>AO42</u>	No acceptable outcome provided.

Table 10.3.4.3A Outcomes for Non-urban Open Space Infrastructure Area

Non-urban open space infrastructure area	Ecological protection and rehabilitation objectives
Environmental Protection	Provide for management that assists in the area becoming largely self sustaining
Area	and in good bio-condition for its corresponding regional ecosystem. Provide for long-term security of tenure for conservation purposes.
Environmental	Provide for assisted regeneration back to the area's former regional ecosystem
Enhancement Area –	and in good bio-condition.
Type A	Enhance landscape scale habitat connectivity.
	Provide for long-term security of tenure for conservation purposes.
Environmental	Provide for strategic rehabilitation to enhance landscape connectivity and
Enhancement Area –	ecological values.
Type B	Provide for long-term security of tenure for conservation purposes.
Environmental Transition	Provide for establishment of buffer areas that enhance the ecological values of
Area	Environmental Protection and Environmental Enhancement Areas and protect
	them from the impacts of adjacent development; and
	Allow for compatible passive recreation uses including pedestrian and cycleways,
	picnic areas and open play areas and water sensitive urban design features.
Scenic Amenity and	Provide for native landscaping which:
Highway Acoustic Buffer	(a) enhances the rural character of the area;
	(b) provides a visual relief and noise buffer from the Bruce Highway;
	(c) allows for compatible low impact recreation uses;
	(d) allows for farm forestry uses or tree planting for carbon offsets, where appropriate; and
	(e) provides environmental linkages and habitat value.

Table 10.3.4.3B Palmview Ecological and Landscape Protection and Rehabilitation Landscape Units

Landscape Unit	Description	Ecological protection and rehabilitation outcomes	Management requirements
Landscape Unit 1	Landscape unit 1 is located at the eastern end of the plan area and is contiguous with the Mooloolah River National Park to the north and the Birtinya Wetlands to the east and incorporates the riparian corridor of the Mooloolah River. This landscape unit is characterised by a combination of remnant status vegetation, cleared areas and naturally regenerating ecosystems. Existing vegetation includes RE 12.3.5 (Melaleuca quinquenervia open forest on coastal alluvial plains) with the endangered RE 12.3.1 (gallery rainforest/notophyll vine forest on alluvial plains) as subdominant vegetation within the Mooloolah River riparian zone. Remnant vegetation within this landscape unit is identified as significant wetland by the SEQ Regional Coastal Management Plan and HES by the South East Queensland Regional Plan. This landscape unit includes Essential Habitat for threatened species Crinia tinnula (Wallum froglet) and Litoria freycineti (Wallum Rocketfrog).	Rehabilitation of the wetland and riparian ecosystems to remnant status. Increase in the extent of wetland and riparian ecosystems. Enhancement of the landscape scale habitat connectivity forming part of the Mooloolah River Corridor. Provision of habitat for significant flora and fauna species. Protection of the water quality of the Mooloolah River and off-site receiving environments. Maintenance of the hydrological function.	The management of this landscape unit is to support the regeneration of ecosystems through a combination of passive and active mechanisms. Management actions are to include the following:
Landscape Unit 2	Landscape unit 2 is located at the eastern end of the plan area. It incorporates the Mooloolah River riparian zone, extending upstream to its confluence with Sippy Creek. Existing vegetation includes RE 12.3.5 (Melaleuca quinquenervia open forest on coastal alluvial plains) with the endangered RE 12.3.1 (gallery rainforest/notophyll vine forest on alluvial plains) as subdominant vegetation within the Mooloolah River riparian zone and cleared pasture with isolated trees. Remnant vegetation within this landscape unit is identified as significant wetland by the SEQ Regional Coastal Management Plan and HES by the South East Queensland Regional Plan. This landscape unit includes essential habitat for threatened species Crinia tinnula (Wallum froglet) and Litoria freycineti (Wallum Rocketfrog).	 Rehabilitation of the wetland and riparian ecosystems to remnant status. Increase in extent of wetland and riparian ecosystems to provide a minimum width of vegetation of 100 metres from the high bank of the Mooloolah River. Enhancement of the landscape scale habitat connectivity forming part of the Mooloolah River Corridor. Provision of habitat for significant flora and fauna species. Protection of the water quality of the Mooloolah River and off-site receiving environments. Maintenance of the hydrological function. 	The management of this landscape unit is to re-establish riparian ecosystems through mainly active mechanisms. Management actions are to include the following: removal of invasive exotic species; active revegetation, with particular emphasis on consolidating and expanding riparian vegetation; bed and bank restoration works as required; careful management or rectification of concentrated surface drainage or modified flows to natural sedgeland and wetland areas so as to prevent damage from scouring, changes in wetland hydrology, the provision of degraded habitat for the establishment invasive species and other negative impacts.
Landscape Unit 3	Landscape Unit 3 is located at the eastern end of the plan area. It is contiguous with the Mooloolah River National Park to the north and extends into Landscape unit 1 to the east. This landscape unit is characterised by cleared areas with isolated trees. A large proportion of this landscape unit is identified as significant wetland by the SEQ Regional Coastal Management Plan and HES by the South East Queensland Regional Plan.	 Provision of habitat for significant flora and fauna species, with particular emphasis on maintaining grassland as grazing habitat for macropods. Enhancement of the landscape scale habitat connectivity by creating a mosaic of habitat types. Protection of the water quality of the Mooloolah River and off-site receiving environments. Maintenance of hydrological function. 	The management of this landscape unit is to retain grassland habitat. Management actions are to include the following:- • removal of invasive exotic species; • maintenance of grass cover by regular slashing; • selective revegetation, with particular emphasis on establishing "habitat stepping stones"; • careful management or rectification of the concentrated surface drainage or modified flows to

Landscape Unit	Description	Ecological protection and rehabilitation outcomes	Management requirements
·	•		natural sedgeland and wetland areas so as to prevent damage from scouring, changes in wetland hydrology, provision of degraded habitat for the establishment of invasive species and other negative impacts.
Landscape Unit 4	Landscape unit 4 is located centrally within the plan area. At its southern extent, this landscape unit includes the riparian corridor on the northern side of Sippy Creek. Remnant vegetation at its northern edge abuts residential development. Claymore Road forms the eastern extent of this landscape unit. This landscape unit is characterised by a combination of cleared land and remnant vegetation. Existing vegetation includes RE 12.3.5 (Melaleuca quinquenervia open forest on coastal alluvial plains) along the northern boundary and in the riparian zone of Sippy Creek. All remnant vegetation within this landscape unit is identified as significant wetland by the SEQ Regional Coastal Management Plan and HES by the South East Queensland Regional Plan. This landscape unit includes essential habitat for threatened species Crinia tinnula (Wallum froglet) and Litoria freycineti (Wallum Rocketfrog). The construction of Claymore Road has altered the hydrological regime of this landscape unit and it is now hydrologically separate from landscape units 1-3. The resultant habitat is considered important for supporting frog populations.	 Provision of habitat for significant flora and fauna species, with particular emphasis on maintaining sedgelands as habitat for frogs. Increased extent of wetland and riparian ecosystems to provide a minimum width of vegetation on the northern side of Sippy Creek of 100 metres from the high bank. Enhancement of landscape scale habitat connectivity, with particular emphasis on reconnecting fragmented habitat along east-west and north-south alignments forming part of the Sippy Creek Corridor. Protection of the water quality of the Sippy Creek, Mooloolah River and off-site receiving environments. Maintenance of the hydrological function. 	The management of this landscape unit is to retain and enhance remnant vegetation and sedgelands as frog habitat and re-establish riparian ecosystems through mainly active mechanisms. Management actions are to include the following: • removal of invasive exotic species; • maintenance of sedglands; • active revegetation, with particular emphasis on consolidating and expanding riparian vegetation and reconnecting habitat from east to west and north to south; • planting densities to consider the Manning's roughness coefficient; • bed and bank restoration works as required; and • careful management or rectification of the concentrated surface drainage or modified flows into natural sedgeland and wetland areas so as to prevent damage from scouring, changes in the wetland hydrology, provision of degraded habitat for the establishment invasive species and other negative impacts.
Landscape Unit 5	Landscape unit 5 is located centrally and forms a band that traverses the plan area. It forms the riparian zone on the southern side of Sippy Creek and is a significant component of the Sippy Creek fauna corridor. It is adjacent to residential development to the north and extends south to the confluence of Sippy Creek with the Mooloolah River. This landscape unit is characterised by a large tract of remnant vegetation bordered by cleared pasture. Existing vegetation includes RE 12.3.5 (Melaleuca quinquenervia open forest on coastal alluvial plains) along the riparian zone of Sippy Creek and RE 12.9-10.14 (Eucalyptus pilularis tall open forest on alluvial plains). A large proportion of this landscape unit is identified as significant wetland by the SEQ Regional Coastal Management Plan and HES by the South East Queensland Regional Plan. This landscape unit includes Essential Habitat for threatened species Crinia tinnula (Wallum froglet) and Litoria freycineti (Wallum Rocketfrog).	 Enhancement of landscape scale habitat connectivity, with particular emphasis on reconnecting fragmented habitat along east-west and north-south alignments forming part of the Sippy Creek Corridor. Provision of habitat for significant flora and fauna species. Protection of the water quality of Sippy Creek and off-site receiving environments. Maintenance of the hydrological function. Provision of opportunities for low impact recreation facilities at the western and southern edges of the landscape unit (identified as RR1). Maintenance and enhancement of biodiversity values within an urban recreation area. 	The management of this landscape unit is to retain and enhance remnant vegetation and protect habitat from the impacts of development. Management actions are to include the following:- • remove invasive exotic species; • retain mature and hollow bearing trees, minimise public access under Eucalypts by buffering with vegetation and locate recreation infrastructure away from Eucalypts in an urban recreation area; • maintain grassed transition zone between residential development and vegetated areas; • careful management or rectification of concentrated surface drainage or modified flows into natural sedgeland and wetland areas so as to prevent damage from scouring, changes in the wetland hydrology, provision of degraded habitat for the establishment invasive species and other negative impacts.
Landscape Unit 6	Landscape unit 6 is located in the north-west of the plan	Increased extent of wetland and riparian ecosystems	The management of this landscape unit is to re-establish

Landscape Unit	Description	Ecological protection and rehabilitation outcomes	Management requirements
	area, forming the riparian zone on the southern side of Sippy Creek and is a significant component of the Sippy Creek fauna corridor. It is adjacent to residential development to the north. This landscape unit is characterised by cleared pasture with a narrow band of remnant vegetation in the riparian zone. Existing vegetation includes of concern RE 12.3.2 (Eucalyptus grandis tall open forest on alluvial plains) along the riparian zone of Sippy Creek. All remnant vegetation within this landscape unit is a referrable wetland and has been identified as HES by the South East Queensland Regional Plan.	to provide a minimum width of vegetation on the southern side of Sippy Creek of 100 metres from the high bank. Rehabilitation of the wetland and riparian ecosystems to remnant status. Enhancement of landscape scale habitat connectivity, with particular emphasis on reconnecting fragmented habitat along an east-west alignment. Provision of habitat for significant flora and fauna species. Protection of the water quality of Sippy Creek and offsite receiving environments. Maintenance of the hydrological function. Provision of opportunities for low impact recreation facilities at the edges of the landscape unit (identified as RR1).	riparian ecosystems through mainly active mechanisms. Management actions are to include the following:- • remove invasive exotic species; • active revegetation, with particular emphasis on consolidating and expanding riparian vegetation and reconnecting habitat from east to west to provide a minimum 100 metre wide corridor along Sippy Creek; • bed and bank restoration works as required; and • maintenance of a grassed transition zone between residential development and a vegetated area.
Landscape Unit 7	Landscape unit 7 is located centrally and forms a band that traverses the plan area, connecting landscape unit 5 to the Mooloolah River riparian corridor that lies just to the south of the Plan Area. It forms part of the Palmview fauna corridor. This landscape unit is characterised by remnant vegetation and a mosaic of vegetation and cleared land. Existing vegetation includes of concern RE 12.3.13 (Closed heathland on seasonally waterlogged alluvial plains near the coast) and RE 12.3.5 (Melaleuca quinquenervia open forest on coastal alluvial plains). All remnant vegetation within this landscape unit is identified as significant wetland by the SEQ Regional Coastal Management Plan and HES by the South East Queensland Regional Plan. This landscape unit includes essential habitat for threatened species Crinia tinnula (Wallum froglet) and Litoria freycineti (Wallum Rocketfrog).	 Enhancement of landscape scale habitat connectivity, with particular emphasis on reconnecting fragmented habitat along a north-south alignment. Increase the extent of wetland ecosystems, with particular emphasis on active regeneration of land enclosed by remnant vegetation. Rehabilitation of wetland ecosystems to remnant status. Provision of habitat for significant flora and fauna species. Protection of the water quality of the Mooloolah River and off-site receiving environments. Maintenance of the hydrological function. Provision of opportunities for low impact recreation facilities in the south-western portion of this landscape unit (identified as DR3). Maintenance and enhancement of biodiversity values within urban recreation areas. 	The management of this landscape unit is to retain and enhance remnant vegetation, re-establish habitat connectivity through mainly active mechanisms and protect habitat from the impacts of development. Management actions are to include the following: • establish fencing and exclude grazing; • removal of invasive exotic species, • infill planting to supplement natural regeneration; • active revegetation, with particular emphasis on consolidating and expanding wetland vegetation and reconnecting habitat from north to south; • retain mature and hollow bearing trees, minimise public access under Eucalypts by buffering with vegetation and locate recreation infrastructure away from Eucalypts in an urban recreation areas; • maintain a grassed transition zone between residential development and vegetated area; • careful management or rectification of the concentrated surface drainage or modified flows into natural sedgeland and wetland areas so as to prevent damage from scouring, changes in the wetland hydrology, the provision of degraded habitat for the establishment of invasive species and other negative impacts.
Landscape Unit 8	Landscape unit 8 is located along the western end of the southern boundary of the plan area. It is contiguous with the Palmview Conservation Park to the south and forms part of the Palmview fauna corridor. This landscape unit is characterised by patches of remnant vegetation along drainage lines and an extensive area of naturally regenerating vegetation. Existing vegetation	 Enhancement of landscape scale habitat connectivity, with particular emphasis on reconnecting fragmented habitat along an east-west alignment. Increase the extent of wetland ecosystems. Rehabilitation of wetland ecosystems to remnant status. 	The management of this landscape unit is to retain and enhance remnant vegetation, re-establish habitat connectivity through mainly active mechanisms and protect habitat from the impacts of development. Management actions are to include the following: establish fencing/ exclude grazing from regenerating

Landscape Unit	Description includes RE 12.3.5 (Melaleuca quinquenervia open forest on coastal alluvial plains). Remnant vegetation within this landscape unit is identified as referable wetland and significant wetland by the SEQ Regional Coastal Management Plan and HES by the South East Queensland Regional Plan. This landscape unit includes essential habitat for threatened species Crinia tinnula (Wallum froglet) and Litoria freycineti (Wallum Rocketfrog).	 Ecological protection and rehabilitation outcomes Provision of habitat for significant flora and fauna species. Protection of the water quality of the adjacent wetland ecosystem and off-site receiving environments. Maintenance of the hydrological function. Provision of opportunities for low impact recreation facilities in the south-western and northern portions of the landscape unit (identified as DR2). Provision of opportunities for complementary sports facilities at the southern edge of the landscape unit (identified as DR2) 	Management requirements areas; removal of invasive exotic species; infill planting to supplement natural regeneration; active revegetation as required, with particular emphasis on consolidating wetland vegetation; retain mature and hollow bearing trees, minimise public access under Eucalypts by buffering with vegetation and locate recreation infrastructure away from Eucalypts in urban recreation areas; maintain grassed transition zone between residential development and vegetated areas; and
		 (identified as DS2). Maintenance and enhancement of biodiversity values within urban recreation areas. 	residential development and vegetated areas; and careful management and/or rectification of concentrated surface drainage or modified flows into natural sedgeland and wetland areas so as to prevent damage from scour, changes in wetland hydrology, provision of degraded habitat for establishment invasive species and other negative impacts.
Landscape Unit 9	Landscape unit 9 is located at the western end of the plan area and extends along the Bruce Highway from the edge of landscape unit 6 in the north to the southern boundary of the plan area. This landscape unit is characterised by cleared areas with scattered trees.	 Enhancement of landscape scale habitat connectivity by creating a mosaic of habitat types. Provision of habitat for significant flora and fauna species. 	The management of this landscape unit is to retain and establish mosaic vegetation. Management actions are to include the following:- removal of invasive exotic species; maintenance of grass cover by regular slashing; selective revegetation, with particular emphasis on establishing "habitat stepping stones".

Sunshine Coast Planning Scheme 2014

Table 10.3.4.3C Environmental Offset Requirements

Environmental Value	Environmental Value Environmental Offset Environmental Offset Requirement			
Impacted	Outcome Sought	Location	Offset Type	Offset
Mannad Environmental Protoc	ction Area or other Regional Ecosystem (where local	and outside the Structure Plan Area)		Provision Rate
Vine Forest	Conserve vegetation, prevents loss of biodiversity,	Within 20km of the site and within	Secure an existing similar vegetation community	1.5 for 1
(comparable with Regional Ecosystem 12.3.1 & 12.3.2)	reduces land degradation and maintain ecological processes.	the local government area.	which is under threat or rehabilitate and secure a suitable offset area.	
Heath	, p. 100000000			1.5 for 1
(comparable with Regional Ecosystem 12.3.13 & 12.3.14)			Maintain safe ecological linkages and fauna movement corridors.	
Mixed Eucalypt (comparable with Regional Ecosystem 12.9-10.14)				1.5 for 1
Wetland or Waterway (comparable with Regional Ecosystem 12.3.5)	Improve the integrity and viability of wetlands, waterways and riparian corridors. Improve water quality, flows and aquatic habitat.		Recovery of degraded wetlands. Improvement in water quality and riparian health.	2 for 1
Mapped Environmental Enhan	ncement Area			
Environmental Enhancement Area Type A	Assist regeneration in areas of high rehabilitation potential.	Within 20km of the site and within Council boundaries.	Rehabilitate and protect similar habitat.	1.5 for 1
Environmental Enhancement Area Type B	Assist regeneration in areas of high rehabilitation potential.	Within 20km of the site and within Council boundaries.	Rehabilitate and protect similar habitat.	1 for 1
Rare and Threatened Species				
Endangered Species, Vulnerable Species and Rare Species.	Improve the population viability of relevant species in the wild.	Within 5km of site and within the local government area.	For fauna, secure existing habitat under threat or rehabilitate and secure habitat for that species and provide safe ecological linkages and fauna movement corridors.	2 for 1
			For flora, secure existing habitat under threat or translocate, propagate, replant and secure habitat for that species.	

Notes

- 1. Where the environmental offset triggers a mapped environmental protection area or enhancement area and a rare and threatened species, the higher offset ratio applies.
- 2. Where the environmental offset is required due to infrastructure preventing the achievement of the 483.4 hectare ecological protection and rehabilitation requirement (i.e. by impacting upon an environmental transition area or other area not already covered in this table), the environmental offset is to be provided as rehabilitated land within 20km of the site and within the local government area on a 1 for 1 basis. Consideration is to be given to using an environmental offset on private land where an infrastructure agreement is in place.

10.3.4.4 Overall Outcomes for the Mixed Density Residential Precinct

- (1) The Mixed Density Residential Precinct is developed as a series of high quality, interconnected, walkable and transit supportive residential neighbourhoods.
- (2) Development in the Mixed Density Residential Precinct accommodates a variety of housing forms including detached, semi-attached and multi-unit residential uses in conjunction with complementary ancillary uses.
- (3) Development in the Mixed Density Residential Precinct incorporates integrated transport and urban open space infrastructure networks that provide a high level of permeability and connectivity between neighbourhoods and key points of economic and community activity.

10.3.4.5 Performance Outcomes and Acceptable Outcomes for the Mixed Density Residential Precinct

10.3.4.6 Overall Outcomes for the Medium Density Residential Precinct

- (a) The Medium Density Residential Precinct is developed as a high quality, medium density residential core within the primary walking catchment of the District Activity Centre and transit station.
- (b) Development in the Medium Density Residential Precinct provides for predominately multi-unit residential uses in conjunction with complementary ancillary uses.
- (c) Development in the Medium Density Residential Precinct provides for a transition between the higher intensity uses provided in the District Activity Centre and surrounding mixed density residential neighbourhoods and incorporates integrated transport and open space networks that provide a high level of permeability and connectivity between neighbourhoods and key points of economic and community activity.

10.3.4.8 Overall Outcomes for the District Activity Centre Precinct

- (1) The District Activity Centre Precinct is developed as a high quality district level activity centre servicing the Palmview community in the Master Planned Area.
- (2) Development in the District Activity Centre Precinct does not unreasonably delay the establishment of or undermine the role of the Sippy Downs Town Centre as the Major Regional Activity Centre for Sippy Downs and the Master Planned Area.
- (3) Development provides for retail uses to be of a scale that is consistent with the following:-
 - (a) the role of the District Activity Centre as defined by the Sunshine Coast Activity Centre Network:
 - (b) the local needs of the Palmview community in the Master Planned Area;
 - (c) a maximum gross floor area of 15,000m².
- (4) Development in the District Activity Centre Precinct accommodates a range of retail, business and commercial, entertainment and community facilities in conjunction with more intensive residential development and is the most concentrated urban setting in the Master Planned Area.
- (5) Development in the District Activity Centre Precinct provides for the establishment of a town centre with a traditional street fronting main street layout and a town park, civic plazas and the main transit station as significant structural elements.

10.3.4.9 Performance Outcomes and Acceptable Outcomes for the District Activity Centre Precinct

PO1	inter	elopment complies with the following of the District Activity Centre conct: development provides for the establishment of a district level activity centre servicing the Palmview community in the Master Planned Area; development is limited in terms of its scale, nature of uses and timing in	AO1	No acceptable outcome provided.

³³ The Planning Scheme Policy for the Palmview Structure Plan provides general advice for the district activity centre precinct

Jart 10

Acceptable Outcomes (denoted as 's' where applicable to self assessable development)

- order not to unreasonably delay the establishment of or undermine the role of the Sippy Downs Town Centre as the Major Regional Activity Centre for Sippy Downs and Palmyiew:
- (c) development provides for the establishment of a small town centre comprising a traditional main street, a town park, civic plazas and the main transit station as significant structural elements contributing to social interaction and community identity;
- (d) development does not involve the establishment of a conventional shopping centre based upon an enclosed or parking lot dominated format which is the antithesis of what is desired for this precinct;
- development provides for a total gross floor area of 15,000m² for all business and commercial uses;
- (f) development provides for high levels of mobility and accessibility within the precinct with the public transport corridors and the main transit station supported by an interconnected network of bicycle and pedestrian infrastructure which prioritises these modes and facilitates access to key facilities within the precinct;
- (g) development is arranged to maximise the vibrancy of public spaces and semi-public spaces through the following:-
 - configuring active uses along frontages to public spaces which maximise pedestrian activity;
 - ensuring a high level of integration with public transport infrastructure including the main transit station, a town square and transit plaza;
 - (iii) ensuring a variety of compatible mixed uses are provided in each site;
 - (iv) incorporating attractive high amenity public and semi-public spaces to encourage and support social interaction and casual meeting;
 - (v) ensuring spaces comply with crime prevention through environmental design and universal design principles;
- (h) development achieves an average net residential density of at least 40 dwellings per hectare;
- (i) development incorporates a high standard of urban design and landscaping that creates attractive sub-tropical buildings, streets and

10.3.4.10 Overall Outcomes for the Local Activity Centre Precinct

(1) The Local Activity Centre Precinct is developed as a high quality local level centre (not full service) providing for the convenience retail, local service and community needs of one or a small cluster of neighbourhoods only.

(3) Development in the Local Activity Centre Precinct provides a street fronting main street layout with active pedestrian edges and surveillance from residential uses.

10.3.4.11 Performance Outcomes and Acceptable Outcomes for the Local Activity Centre Precinct

	Performance Outcomes	Acceptable Outcomes (denoted as 's' where
		applicable to self assessable development)
	r the Local Activity Centre Precinct	
PO1	Development complies with the following intent for the Local Activity Centre Precinct:- (a) development provides for a local	,
	centre (not full service) providing for the convenience retail, local service and community needs of one or a small cluster of neighbourhoods only;	
	(b) development is limited in terms of its scale, nature and timing in order to not unreasonably delay the establishment of or undermine the role of the District Activity Centre or the Sippy Downs Major Regional Activity Centre;	
	(c) development provides for:- (i) a total gross floor area of 2,500m² for all business and commercial uses in each local activity centre; and (ii) a minimum gross floor area of 1,000m² for convenience retail uses in each local activity;	
	 (d) development achieves a higher residential density around these centres; 	
	 (e) development provides a main street style of development with active pedestrian edges and surveillance from residential uses; 	
	(f) development incorporates a high standard of urban design and landscaping that creates attractive sub-tropical buildings, streets and	
	spaces; (g) development provides for the infrastructure identified on the structure plan maps.	
	es, Locations and Built Form	
PO2	Development provides for a pattern of subdivision or site development that facilitates a fine grain built form.	
PO3	Development provides for the vertical integration of uses with all buildings incorporating a mix of residential and non-residential uses.	
PO4	Development provides active frontages with uses that are likely to foster casual social and business interaction for extended periods such as catering uses and retail uses.	ı r

	Performance Outcomes		eptable Outcomes (denoted as ^{'s} where icable to self assessable development)
PO5	Development provides for all residential uses to be located above the ground level.	AO5	No acceptable outcome provided.
PO6	Development for a Food and Drink Outlet does not incorporate a drive through facility.	AO6	No acceptable outcome provided.
P07	Development ensures that parking areas, servicing and access is designed and located as follows:- (a) to ensure that no parking, servicing or access area or structure is a dominant visual element of the Local Activity Centre, the site on which it is developed, or the streetscape; (b) to service the needs of all users of the development; and (c) to avoid pedestrian and vehicular conflict.	A07	Development provides car parking areas, service areas and access driveways that are located where they will not intrude upon the pedestrian use of footpaths and will not dominate the streetscape through the following:- (a) the use of rear access lanes; (b) parking and service areas situated at the rear of the site or below ground level; (c) shared driveways.
PO8	Development ensures that the height of buildings and structures in the Local Activity Centre Precinct does not adversely impact upon the character and amenity of the Master Planned Area or adjacent areas having regard to the following:- (a) overshadowing; (b) privacy and overlooking; (c) views and vistas; (d) building character and appearance; (e) building massing and scale.	AO8 ^s	Development ensures that the height of buildings and structures in the Local Activity Centre Precinct does not exceed 13.5 metres.

10.3.4.12 Overall Outcomes for the Local Employment Area Precinct

- (1) The Local Employment Area Precinct is developed as a high quality local industrial area and business park that complements the District Activity Centre and primarily services the communities of Sippy Downs and Palmview.
- (2) Development in the Local Employment Area Precinct maintains high levels of amenity and provides for the establishment of an attractive local employment area.

10.3.4.13 Performance Outcomes and Acceptable Outcomes for the Local Employment Area Precinct

	Performance Outcomes	Acceptable Outcomes (denoted as 's' where applicable to self assessable development)
Intent f	for the Local Employment Area Precinct ³⁴	
PO1	Development complies with the following intent for the Local Employment Area Precinct:- (a) development provides for the establishment of a local industrial area and business park that complements the District Activity Centre and primarily services the communities of Sippy Downs and Palmview; (b) development accommodates a	AO1 No acceptable outcome provided.

³⁴ The Planning Scheme Policy for the Palmview Structure Plan provides general advice for the local employment area precinct outcomes

_

	Performance Outcomes	Acceptable Outcomes (denoted as 's' where applicable to self assessable development)	
	which are ancillary to the industrial use.		exceed 20% of the total gross floor area of the premises.
PO5	Development ensures that buildings are designed to provide for a range of potential users over the life of the building by allowing for adaptable floor plans.	AO5	No acceptable outcome provided.
Height of	of Buildings and Structures		
PO6	Development ensures that the building height of buildings and structures in the Local Employment Area Precinct does not adversely impact upon the character and amenity of the Master Planned Area or adjacent areas having regard to the following:- (a) overshadowing; (b) privacy and overlooking; (c) views and vistas; (d) building character and appearance; (e) building massing and scale.	AO6 ^s	Development ensures that the building height of buildings and structures in the Local Employment Area Precinct does not exceed a building height of 13.5 metres.

10.3.4.14 Overall Outcomes for the Community Purpose Precinct

- (1) The Community Purpose Precinct is developed for major elements of the community facilities infrastructure network not otherwise accommodated within the District Activity Centre including educational establishments, community uses, utility installations or emergency services and other community facilities infrastructure.
- (2) Development in the Community Purpose Precinct provides for the co-location of compatible community facilities and for strong relationships and connections to be developed between community facilities infrastructure and other infrastructure networks.
- (3) Development in the Community Purpose Precinct maintains high levels of amenity for surrounding residential areas and provides for the establishment of attractive and high quality community facilities.

10.3.4.15 Performance Outcomes and Acceptable Outcomes for the Community Purpose Precinct

	Performance Outcomes		eptable Outcomes (denoted as 's' where icable to self assessable development)
Intent for	the Community Purpose Precinct		
PO1	Development complies with the following intent for the Community Purpose Precinct: (a) development provides for the establishment of major elements of the community facilities infrastructure network not otherwise accommodated within the District Activity Centre or Local Activity Centres including educational establishments, community uses, utility installations or emergency services and other local community facilities infrastructure; (b) development provides for the colocation of compatible community facilities and for strong relationships and connections to be established between the community facilities infrastructure network, the non-urban open-space infrastructure network, the urban open space infrastructure	AO1	No acceptable outcome provided.

	Performance Outcomes	Acceptable Outcomes (denoted as 's' where applicable to self assessable development)
	network and the bicycle and pedestrian and public transport infrastructure networks; (c) development avoids conflict with and protects the amenity of surrounding residential areas, including the avoidance of adverse traffic and vehicle parking impacts; (d) development incorporates a high standard of urban design and landscaping that creates attractive sub-tropical buildings, streets and spaces; (e) development provides for the infrastructure identified on the structure plan maps.	
Height o	f Buildings and Structures	
PO2	Development ensures that the building height of buildings and structures in the Community Purpose Precinct does not adversely impact upon the character and amenity of the Master Planned Area or adjacent areas having regard to the following:- (a) overshadowing; (b) privacy and overlooking; (c) views and vistas; (d) building character and appearance; (e) building massing and scale.	AO2 ^s Development ensures that the building height of buildings and structures in the Community Purpose Precinct does not exceed a building height of 13.5 metres.

10.3.4.16 Overall Outcomes for the Urban Open Space Precinct

- (1) The Urban Open Space Precinct provides a range of sport and recreation functions required to service the needs of the Palmview community in the Master Planned Area and the broader community of the region.
- (2) Development in the Urban Open Space Precinct provides for the retention and rehabilitation of ecologically important areas where appropriate and practicable.

10.3.4.17 Performance Outcomes and Acceptable Outcomes for the Urban Open Space Precinct

	Performance Outcomes		eptable Outcomes (denoted as 's' where icable to self assessable development)
Intent for the	Urban Open Space Precinct		
inte (a)	velopment complies with the following ent for the Urban Open Space Precinct: development provides for a range of sport and recreation functions required to service the needs of the Palmview community in the Master Planned Area and the broader community of the region as well as providing for the retention and rehabilitation of any ecologically important areas where appropriate and practicable; development in the Recreation Park Sub-precinct provides predominantly for passive or informal recreational activities that are low impact and generally compatible with the retention of ecological values; development in the Sports Park Sub-	AO1	No acceptable outcome provided.

Performance Outcomes	Acceptable Outcomes (denoted as 's' where applicable to self assessable development)
precinct accommodates a full range of recreational activities, including organised sporting activities that in some instances require specific land configurations that may not be compatible with the retention of ecological values; (d) development incorporates a high standard of urban design and landscaping that creates attractive sub-tropical buildings and spaces; (e) development incorporates principles of crime prevention through environmental design; (f) development effectively integrates with the non-urban open space infrastructure network; (g) development avoids conflicts with and protects the amenity of surrounding residential areas; (h) development provides for the infrastructure identified on the structure plan maps.	
Height of Buildings and Structures	
PO2 Development ensures that the building height of buildings and structures in the Urban Open Space Precinct does not adversely impact upon the character and amenity of the Master Planned Area or adjacent areas having regard to the following:- (a) overshadowing; (b) privacy and overlooking; (c) views and vistas; (d) building character and appearance; (e) building massing and scale.	AO2.1 ^s Development ensures that the building height of buildings in the Urban Open Space Precinct does not exceed a building height of 8.5 metres. AO2.2 ^s Development ensures that the building height of structures in the Urban Open Space Precinct does not exceed a building height of 13.5 metres.

10.3.4.18 Overall Outcomes for the Non-urban Open Space Precinct

- (1) The Non-urban Open Space Precinct provides land for the protection and enhancement of ecologically important areas and landscape values;
- (2) Land within the Non-urban Open Space Precinct is not developed for urban purposes, other than for the infrastructure identified on the structure plan maps.

10.3.4.19 Performance Outcomes and Acceptable Outcomes for the Nonurban Open Space Precinct

	Performance Outcomes	Acceptable Outcomes (denoted as 's' where applicable to self assessable development)
Intent fo	r the Non-urban Open Space Precinct	
PO1	Development complies with the following intent for the Non-urban Open Space Precinct:- (a) development provides for the protection and enhancement of important ecological and landscape values; (b) development in the Environmental Protection and Enhancement Subprecinct provides for the protection, rehabilitation, buffering and reconnection of native remnant and	AO1 No acceptable outcome provided.

10.3.4.20 Overall Outcomes for the Development of Infrastructure and Services

building massing and scale.

- (1) Development in the Master Planned Area is consistent with the development entitlements and other assumptions upon which infrastructure has been planned or provided by the local government or other infrastructure provider.
- (2) Development in the Master Planned Area provides the infrastructure networks identified in the following:-
 - (a) the Palmview Structure Plan, in particular the structure plan maps and Sunshine Coast Planning Scheme other than to the extent that an infrastructure arrangement applicable to the land subject of the development specifically states that the infrastructure arrangement is to prevail over the Palmview Structure Plan and Sunshine Coast Planning Scheme to the extent of any inconsistency;
 - (b) an infrastructure arrangement applicable to the land the subject of the development.
- (3) Development in the Master Planned Area which is adjacent to non-residential uses such as local activity centres and educational establishments provides for adequate infrastructure and services to

- be established to service the non-residential uses to avoid adverse impacts on the amenity and character of the surrounding areas, in particular, neighbourhoods.
- (4) Development in the Master Planned Area ensures the infrastructure and services necessary to service the development at the desired standards of service are provided ahead of or in conjunction with the staging of the development.
- (5) Development in the Master Planned Area ensures the infrastructure and services are protected and enhanced.
- (6) Development in the Master Planned Area ensures the infrastructure and services are safe, efficient, well located and legible.
- (7) Development in the Master Planned Area ensures that infrastructure and services corridors and areas are identified, planned and designed to minimise land use conflict, allow effective integration within the design of the development and allow for flexibility to accommodate future needs.
- (8) Development in the Master Planned Area ensures that infrastructure and services is designed, located and operated in order to:-
 - (a) reduce greenhouse gas emissions;
 - (b) provide for fauna movement; and
 - (c) minimise impacts on ecologically important areas and important landscape and scenic amenity values.
- (9) Development in the Master Planned Area promotes sustainable energy infrastructure that contributes to the development's ongoing energy needs.
- (10) Development in the Master Planned Area ensures that infrastructure and services is co-located to achieve cost efficiencies and reduce the potential environmental and social impacts generated by the construction, operation and maintenance of multiple infrastructure corridors.
- (11) Development in the Master Planned Area ensures that infrastructure and services is planned, designed and constructed to maximise immunity to risks associated with natural disasters and other public emergencies.

10.3.4.21 Performance Outcomes and Acceptable Outcomes for the Development of Infrastructure and Services

	Performance Outcomes		ptable Outcomes (denoted as 's' where cable to self assessable development)
Infrastru	ucture Generally		
PO1	Development provides for the orderly and efficient provision of planned infrastructure as specified in the following:- (a) the Palmview Structure Plan; (b) the other parts of Sunshine Coast Planning Scheme.	AO1	No acceptable outcome provided.
PO2	Development facilitates and does not delay or compromise the efficient, effective, timely and sustainable provision of the following:- (a) the infrastructure identified in the structure plan maps; (b) other infrastructure not identified in the structure plan maps; (c) services in the Master Planned Area.	AO2	No acceptable outcome provided.
PO3	Development is carried out in accordance with the infrastructure networks identified in the structure plan maps unless otherwise stated in an infrastructure arrangement applicable to the relevant items of the applicable infrastructure network.	AO3	No acceptable outcome provided.
PO4	Development is consistent with the	AO4	No acceptable outcome provided.

Performance Outcomes			Acceptable Outcomes (denoted as 's' where		
		applic	cable to self assessable development)		
	development entitlements upon which the				
	infrastructure and other development				
	obligations have been planned and provided by the local government and				
	other infrastructure providers.				
PO5	Development does not adversely impact	AO5	No acceptable outcome provided.		
	on or compromise the existing or planned		no acceptable calcolled promaca.		
	infrastructure and services networks.				
PO6	Development protects that part of the	AO6	No acceptable outcome provided.		
	Master Planned Area which is required for				
	planned or proposed infrastructure and				
B07	services.	407	N (II)		
PO7	Development provides for the following:- (a) for infrastructure that avoids or	A07	No acceptable outcome provided.		
	minimises vegetation clearing and				
	habitat disturbance to the greatest				
	extent practicable;				
	(b) where vegetation clearing and				
	habitat disturbance is unavoidable,				
	for the relocation of fauna and flora.				
PO8	Development provides for infrastructure	AO8	No acceptable outcome provided.		
	requiring vegetation clearing and habitat				
	disturbance to be undertaken in the				
	following manner:-				
	(a) to minimise erosion and sediment loss;				
	(b) to protect the environmental				
	characteristics of downstream				
	receiving environments;				
	(c) to provide for the staged				
	rehabilitation of disturbed areas.				
PO9	Development for infrastructure associated	AO9	No acceptable outcome provided.		
	with the development of the Master				
	Planned Area in the ecologically important areas specifically identified on Other				
	Plans Map OPM P2(a) (Palmview				
	Master Planned Area Ecologically				
	Important Areas) provides an				
	environmental offset for the area that is				
	adversely impacted by the				
D040	infrastructure ³³ .	1010	N		
PO10	Development provides infrastructure and	AO10	No acceptable outcome provided.		
	services which achieves the following:- (a) meets the specified standards at the				
	least whole of life cycle cost,				
	including avoiding unnecessary				
	duplication;				
	(b) is robust and fit for the purpose and				
	intended period of operation;				
	(c) is easily maintained without				
	unnecessarily requiring specialist				
	expertise or equipment; (d) is comprised of components and				
	materials that are as readily				
	accessible and available as				
	reasonably practicable;				
	(e) is readily integrated with the existing				
	infrastructure and service networks				
	and facilitates the orderly provision of				
	future infrastructure and service				
	networks.				

The Planning Scheme Policy for the Palmview Structure Plan provides advice for the environmental offset outcomes.

	external to the development; (e) where required, provides bus prior at major intersections and is capal of accommodating prioritised pub transport circulation;	ole	
	(f) incorporates landscaping and ver	he a	
	(g) is safe, efficient and legible meeting the requirements of t intended use;	he	
	(h) where required for evacuati purposes is established above t defined flood event; (i) appropriate access and eggess.	he	
	(i) appropriate access and egress emergency services vehicles.	UI	

The Planning Scheme Policy for the Palmview Structure Plan provides general advice, standards and guidelines for the road transport infrastructure network outcomes related to fauna movement.

	Performance Outcomes	Accep	otable Outcomes (denoted as 's' where
			cable to self assessable development)
PO13	Development provides for a network of local streets which:- (a) is highly permeable;	AO13	No acceptable outcome provided.
	(b) based on a grid or modified grid		
	pattern layout that operates a		
	neighbourhood and district levels		
	and		
	(c) ensures priority of pedestrians cyclists and public transport users		
	over private vehicles.		
Public Ti	ransport Infrastructure Network ³⁵		
PO14	Development is carried out in accordance	AO14	No acceptable outcome provided.
	with:-		·
	(a) the public transport infrastructure		
	network identified conceptually on		
	Other Plans Map OPM P9 (Palmview Master Planned Area		
	Public Transport Infrastructure		
	Network); and		
	(b) the standards for the public		
	transport infrastructure network and		
	fauna movement specified in the		
	Transport and Parking Code, the		
	Planning Scheme Policy for the Transport and Parking Code and		
	the Planning Scheme Policy for		
	the Palmview Structure Plan.		
PO15	Development provides for public transport		No acceptable outcome provided.
	routes and corridor(s) to be efficiently and		
	effectively connected to:-		
	(a) key destinations such as regiona and district parks, the District		
	Activity Centre, Local Activity		
	Centres and schools; and		
	(b) regional public transport networks		
	outside of the Master Planned Area.		
PO16	Development provides for public transport	AO16	No acceptable outcome provided.
1 313	routes and corridor(s) to be designed and		140 acceptable outcome provided.
	constructed to:-		
	(a) minimise impacts on residentia		
	amenity;		
	(b) maximise safety for users of the		
	corridor and surrounding areas; (c) minimise impacts on ecologically		
	important areas including changes to		
	the hydrological regime.		
PO17	Development provides land for the main	AO17	No acceptable outcome provided.
	transit station which is intended to:-		
	(a) be established as a prominent		
	feature of the District Activity Centre; (b) be established as a signature transit		
	station in accordance with the <i>Public</i>		
	Transport Infrastructure Manual;		
	(c) be integrated with the transit plaza		
	and the urban open space		
	infrastructure network and bicycle		
	and pedestrian infrastructure		
	network; (d) create a memorable community place		
	that provides an important source of		
	meaning and identity for residents of		
	Janua lastining for restautito of	1	

The Planning Scheme Policy for the Palmview Structure Plan provides general advice, standards and guidelines for the public transport infrastructure network outcomes related to fauna movement.
