

**Mooloolaba Transport Corridor
Upgrade (MTCU) Project**
Stage 1b – Walan Street, Mooloolaba

Project number: H9272

Notice to businesses and residents
Drainage works
16 & 18 Walan Street Mooloolaba
27 - 30 January 2021, 7am – 5pm**Drainage works**

As part of the MTCU project drainage lines must be installed along the eastern side of Walan Street below the future kerb location. This will ensure adequate drainage takes place underneath the pavement.

The drainage area crosses through driveways and requires cutting across the temporary asphalt driveways adjacent to your home/premises then reinstating the driveways.

Property access will be maintained during these works. Site workers will also be in place to assist with access during these works.

What we are doing during these works

To allow access to your car park and premises, these works will be done in two parts, with the driveway cut into two sections.

Half of the driveway will be under construction while vehicles use the other half, and then works will be 'switched'. Temporary steel plates may be used to assist with driveway access.

Pedestrian access will remain to residences and businesses. Temporary pedestrian footpaths will be in place as required.

What to expect during these works

Medium level intermittent noise should be expected.

The driveway sections that are affected by the works will be temporarily reinstated with asphalt (bitumen) and final reinstatement will occur as part of the final driveway construction.

Please ask your clients or visitors to see the onsite construction team should they require any assistance with access.

Register to receive project updates

To receive regular project updates throughout the construction period, please register your contact details by emailing your details to
