

## Woombye Streetscape Project

### Pedestrian crossing and landscape works

#### May construction update

All works are weather and site conditions permitting.

Blackall Street, Woombye

Temporary changes to traffic conditions – including traffic control from 8 – 26 May day and night

### Construction overview

Weather permitting, May will see the completion of all major construction activity for the streetscape.

May construction activity will include:

- installation of the second raised pedestrian crossing on Blackall Street (in the same location as the existing crossing between SPAR Woombye and QML Pathology)
- lighting installation
- asphalt (bitumen) works
- minor works including:
  - street signage
  - ongoing planting
  - line marking
  - footpath works
  - street furniture installation

While traffic flow will be **maintained** along Blackall Street to support local businesses, some temporary changes to traffic conditions will be required, particularly during construction of the raised pedestrian crossing.

For safety reasons some on-street car parking areas will be temporarily inaccessible during these works.

Pedestrian/customer access will **remain available** to all businesses.

### Temporary changes to traffic conditions - traffic flow and parking

#### Day traffic arrangements 6am to 8pm: Monday 8 May to Friday 26 May, Blackall Street

To maintain traffic flow along Blackall Street during the pedestrian crossing construction, the crossing will be built one half at a time.

This will require one lane of traffic to remain OPEN while the other remains temporarily CLOSED.

Traffic controllers will be in place with contra-flow traffic operating. This means one-way traffic flows in one direction, before traffic is then 'switched' to one-way traffic flow in the other direction.

Traffic controllers will assist motorists with access to driveways and available on-street parking as required.

We recommend allowing an extra 5-10 minutes of travel time during this period and thank you in advance for your patience and understanding.

## Night traffic arrangements 8pm to 6am: Monday 8 May to Friday 26 May, Blackall Street

Temporary traffic signals will be in place to manage traffic under the contra-flow arrangement.

No traffic controllers will be in attendance.

For safety reasons the majority of on street parking in the construction area will be temporarily unavailable each evening.

***\*Please refer to the maps on pages 2 and 3 of this update to view the day and night time contraflow traffic arrangements and share this information with customers, staff, suppliers, delivery drivers, friends and family as required.***

## What to expect during construction

Large trucks and machinery will be operating. While the construction team will try to mitigate noise as much as possible, intermittent noise is to be expected.

Dust mitigation measures will be in place.

We ask motorists to allow an extra 5-10 minutes of travel time while the contra-flow traffic set up is in place.

## Contact the project team

For any questions about these works, please email the project team on:

[woombyestreetscape@sunshinecoast.qld.gov.au](mailto:woombyestreetscape@sunshinecoast.qld.gov.au)

You can also contact Council's customer service team on (07) 5475 7272 (Monday to Friday 8.15am – 5pm). Please quote Woombye Streetscape Project.

*All works are subject to favourable weather and site conditions.*

Weather permitting, two-way traffic should be operating by Saturday 27 May.

## Please continue to support local businesses

All businesses will remain OPEN as per normal trading hours. We thank you for continuing to support local businesses during construction.

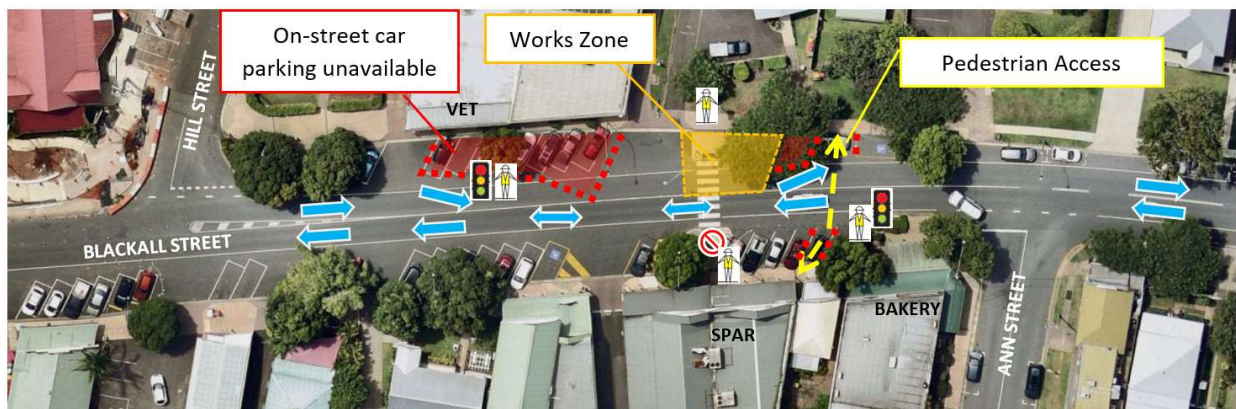

## Thank you to the Woombye community

As the project nears completion, we would like to thank the local community for your patience and cooperation during construction.

A special thank you to local businesses and community organisations in Blackall Street.

Woombye's reputation as a friendly and welcoming town has been reinforced during the streetscape project.

We will issue one final construction update before the project's completion.

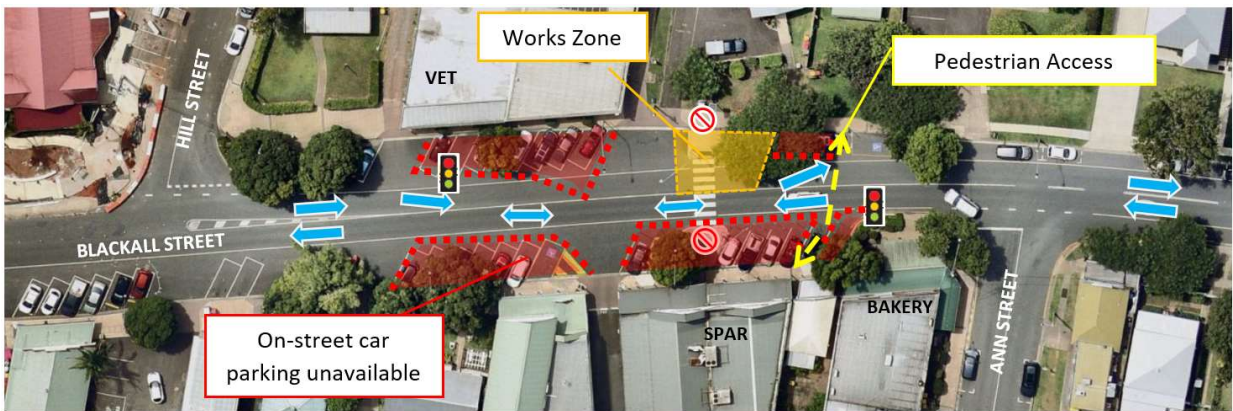

***\*DAY TRAFFIC ARRANGEMENTS 6am – 8pm. EAST BOUND LANE***

*Raised pedestrian crossing works (weather and site conditions dependent)*

*\*DAY TRAFFIC ARRANGEMENTS 6am – 8pm. WEST BOUND LANE
