

To the Resident

Revetment Wall Reconstruction – Charles Clarke Park - Mooloolaba

Project summary

As part of Sunshine Coast Council's program of works to improve infrastructure and coastal protection across the coast we are replacing the existing revetment wall at Charles Clarke Park. The ageing revetment wall at this popular area is degraded and no longer effective.

This renewal will ensure the parkland and footpath are protected from coastal hazards and will include:

- reconstructing up to 180 lineal metres of the revetment wall
- rebuilding the degraded coastal path, along with other minor parkland improvements
- installing a new compliant handrail and balustrades.

Start date

We have scheduled work to start in late January 2024, aiming for completion July 2024 (weather and site conditions permitting).

Property access and parking

For the safety of our community and contractors, the car park will be closed during this time. The majority of car parking spaces along River Esplanade will remain open.

Public toilets, barbecues and the playground will also remain open. A temporary footpath will run parallel with River Esplanade to enable safe passage for pedestrians and cyclists.

Traffic management

Heavy vehicles delivering construction materials will be managed with traffic controllers who will supervise works for public safety. We will do everything possible to ensure this project is completed on time and with minimal inconvenience to the public.

We appreciate your patience during construction.

Further information

For further information about this project please contact council's project officer, Paul Beckworth on the details below (stating project number K3827 Revetment Wall Reconstruction Charles Clarke Park).

A note from your local councillor

Many in our community are familiar with the stunning views of the marina at the Wharf Mooloolaba and the Mooloolah River looking out from Charles Clarke Park. The park is supported by a revetment wall which I have noticed is aging and in some sections starting to fail. I realise this park is very popular for residents and understand that works may cause an inconvenience for some, however I am sure many will understand the renewal of these assets is an important function that council undertake and will ensure the continued enjoyment of this fabulous park by all for many years to come. Cr Joe Natoli
