

# Pumicestone Catchment Convergence 2021

*Insights for a healthy future*

**February 16 -18 2021**  
USC Auditorium, University of the  
Sunshine Coast, Sippy Downs or online

You are invited to participate in a three-day conference to share knowledge of the unique Pumicestone Passage and its catchment and review the action plan to ensure its healthy future.

**Keynote speaker: Mike Ronan, Manager Wetlands,  
Department of Environment and Science.**

The first two days will explore traditional ecological knowledge, community science and stewardship, agricultural knowledge and practice, marine and terrestrial habitat and species, climate change impacts and adaptation, and sustainable development. On the third day this information will be reviewed and consolidated into the next Pumicestone Catchment Action Plan.

There will be a minimal cost to attend in person, with concessions available.

Registrations will be open in December. Save the dates!

For further information contact Susie Chapman at [susie.c@hlw.org.au](mailto:susie.c@hlw.org.au)

## PUMICESTONE CATCHMENT CONVERGENCE 2021

This project is proudly supported by Sunshine Coast Council's grants program and by Healthy Land and Water through funding from the Australian Government's National Landcare Program.
