

**Mooloolaba Transport Corridor  
Upgrade Project**  
*Stage 1B – Walan Street, Mooloolaba*

Project number: H9272

**Unitywater works – Walan Street**  
**Thursday 11 February – Friday 12 March 2021**  
**Day and night works** (all works weather and site conditions permitting)

As part of the final Stage 1B Walan Street upgrade, Unitywater water main connection works are being undertaken.

These works will take place along Walan Street at various times of the day and night during the months of February and March 2021.

Unitywater will keep residents and businesses informed of temporary changes to water supply.

We will keep you updated about any night time activities associated with the works. The first of these nightworks is scheduled to take place tonight.

**Water main connection works**  
**Thursday 11 February, 6pm – 6am**

Unitywater will install a water main valve near the corner of Walan Street and Smith Street, Mooloolaba.

These works must be undertaken at night to minimise disruption to water supply for nearby residents and businesses.

**What to expect during these works?**

Nearby businesses and residents should expect intermittent, medium-level construction noise throughout the evening.

To install the valve, the water main must be cut. Cutting is estimated to take about 1.5 hours between 10pm and 11.30pm on Thursday 11 February.

Works will then continue throughout the evening and early into Friday morning.

Works are expected to generate low-level noise from midnight to 6am.

**Temporary changes to traffic conditions**

During all Unitywater works, Walan Street will remain open to traffic with partial lane closures and traffic control in place as required.

These temporary changes are required for safety reasons.

**Unitywater contact information**

Should you have any questions about these works, please contact Unitywater on:
