

Truck Haul Campaign Notification Dulong Quarry to Image Flat Quarry

August 2025

SUBSCRIBE FOR E-NOTIFICATIONS

See details overleaf about subscribing to **email notifications** for Image Flat and Dulong Quarry rock blasts and truck haul campaigns.

Sunshine Coast Council's quarries are located at Image Flat and Dulong. Image Flat quarry has operated since the 1960s, and Dulong since the 1970s. Rock product is extracted from these quarry sites through blasting activities using explosives to break the rock. Today these quarries supply premium quality rock products for the construction, maintenance and repair of the region's 2597km of sealed roads and 474km of unsealed roads. Council and ratepayers receive significant savings using material from Image Flat and Dulong quarries.

Scheduled truck haul activity

Sunshine Coast Council will coordinate an upcoming truck haul activity between Dulong quarry and Image Flat quarry. These truck haul activities will occur in accordance with the conditions of Council's environmentally relevant activity (ERA) permit EPPR00777413 issued by the Department of Environment, Tourism, Science and Innovation.

Trucks will collect existing blasted rock from Dulong Quarry (Dulong School Road and Sherwell Road, Dulong) and transport it to Image Flat Quarry (175 Image Flat Road, Image Flat) for crushing and processing. This truck haul route between quarry sites has been approved by the Department of Transport and Main Roads.

Timeframe: Commencing on Tuesday 12 August 2025 for approximately seven (7) weeks. Completion of this truck haul campaign within the scheduled timeframe is dependent upon site and environmental conditions, with possible delays or extensions caused by wet weather.

Times: Trucks hauling from 6.00am to 5.00pm weekdays and possibly Saturdays.

Trucks used for haulage

Council engages private contractors to transport covered loads of rock from Dulong quarry to Image Flat quarry. These trucks do not carry Sunshine Coast Council branding. Quarry-related vehicles are among the larger grouping of trucks travelling on roads in the Image Flat and Dulong area. Many other commercial and private contractor trucks operated by other service providers may also be present for unrelated activities. These include B double trucks which do not service or visit the Image Flat and Dulong quarry sites.

Traffic management and road safety

Signage will be activated on local roads to advise road users that quarry trucks are operating in the vicinity. Drop-down roadside signage (indicating "Quarry trucks in operation") will be activated for the duration of the truck haul timeframe. For your own safety and the safety of others, Council asks the community for cooperation with the following:

- **Slow down** – Observe the stated speed limits within and around council sites for the safety of motorists, pedestrians, road workers and traffic controllers.
- **Be patient** – Recognise that truck haulage activity is necessary even though it may cause frustration for motorists.
- **Allow for possible delays** – Factor in extra travel time to allow for potential delays due to truck haulage activity.
