

Mooloolaba Foreshore Revitalisation

13 May 2025

Stage two update

We would like to share some exciting news regarding the foreshore's revitalisation: a contractor with extensive expertise in marine civil infrastructure has been appointed to deliver Stage Two.

SEE Civil will construct Stage Two, after recently acquiring the civil arm of Hall Contracting - a global leader in civil works based on the Sunshine Coast.

By continuing to engage in open conversations with the contractor during the tender phase, and ongoing discussions with our community, businesses and funding partners, we've been able to enhance the project design in a way that benefits everyone.

Key improvements include:

- a secant pier construction method for the terraced seawall, reducing its footprint and buried terraces
- refined deck and pathway alignment to balance public space and enhance connections between the beach and businesses.

The refinements, undertaken over several months, maximise community amenity, coastal protection and value to ratepayers. They result in no net loss of usable beach with a future sand renourishment program also to be put in place.

Find out more about the latest news on the contractor appointment and view the latest artist impressions on [OurSC.com.au](https://www.oursc.com.au).

What's happening next

Early works are continuing through to the end of June 2025. Stage Two major construction works are anticipated to start mid-July 2025 (after the Queensland school holidays), with an anticipated 20 month construction period, pending weather, site conditions.

Works activity will be planned to minimise disruption through peak Christmas periods.

We will be sharing further information about the staged construction program with our community soon.

Access to the beach, including a surf lifesaver patrol flagged area, and access to businesses, accommodation providers and private residences will remain during the construction period.

Mooloolaba will remain 'open' and ready to welcome locals and visitors during the project.
