

Moffat Beach reconstruction project

7 August 2024 update

Thanks for subscribing to stay updated on local projects at Moffat Beach, including the seawall reconstruction project.

We've been receiving your emails with questions and comments and this update aims to provide information on the Norfolk trees.

Norfolk trees

We hear your concerns about the Norfolk trees. We are committed to ensuring the safety at, and beauty of, our beloved Moffat Beach.

To ensure the longevity and effectiveness of the reconstructed seawall – and the safety of our community and health of the beach – we are seeking the advice of experienced, independent expert engineers who specialise in coastal engineering projects.

They will use localised data and modelling to assess what is most appropriate for this specific location.

Until such time as this analysis is complete, and the potential implications for the existing open space and vegetation behind the seawall is understood, Council will not have sufficient information to make an informed decision on the Norfolk trees.

Once the options analysis is complete and we have the consultants' recommendations, we will update our community.

Thank-you for taking the time to read this update. We will continue to update you as more information becomes available.

Please share this with family and friends who may be interested in Moffat Beach and encourage them to subscribe.
