

The Resident

Seawall and Foreshore Works - Esplanade, Golden Beach

Project summary

Sunshine Coast Council is committed to improving infrastructure and coastal protection across our region. We are rebuilding an aged section of the seawall that is degraded and no longer effective, between Jellicoe and Nelson Streets.

The project will help protect the parkland and footpath from coastal hazards and will include:

- reconstructing and raising approximately 80 metres of the existing seawall using grouted rock
- installing tiles to create a 'living seawall' with habitat for sea creatures
- a new section of footpath and balustrade, reinstating the barbecue shelter, benches and binoculars
- reinstating the parkland and planting.

Work dates

Works will take place from late February to June 2024 (weather and site conditions permitting).

Property access and parking

Access to residences and properties should be maintained throughout the project.

Traffic management

For the safety of our community, the works area will be fenced off and the foreshore and footpath closed.

Pedestrians will be directed onto existing footpaths around the works site.

Construction vehicles and deliveries will be managed to ensure public safety.

The amenities block will remain open.

Further information

For further information please contact council's project officer, Paul Beckworth, on the details below (stating project number K4295).

A note from your local councillor

I am pleased to see these works commencing early next year.

Seawalls are an important key component in council's infrastructure used to help protect parkland and footpaths from coastal hazards.

I thank residents for their patience and understanding during construction.

Cr Terry Landsberg
