Subject: Integration of Total Asset Management Plans (TAMPS) and Council's LGIP

Barry,

Please incorporate this response into the LGIP document, as required. Thanks.

Subject: FW: Integration of Total Asset Management Plans (TAMPS) and Council's LGIP

Hi Nick,

Yes agree these points are consistent with TAMP's.

Kind Regards,

Chris

Subject: RE: Integration of Total Asset Management Plans (TAMPS) and Council's LGIP

Chris,

Thanks for your response. Please check the request below and advise of your agreement that it is consistent with TAMP applications.

Following on from previous discussions, I have itemised below areas where the integration of TAMPS and LGIP is applicable for Sunshine Coast Council. I ask that you review these points, change or add as you see fit and provide back to me as an agreed position on the integration process:-

- TAMPS are either complete or well advanced across all of Council's infrastructure networks, enabling appropriate services to be provided to our community. A focus of these TAMPS is to recognise the age, condition and suitability of infrastructure sufficient to inform a capital works Renewals programme.
- There are equivalent TAMPS covering the LGIP networks of Stormwater (quality and conveyance), Transport (road and active), and Parks & Open Space embellishments. (It is noted that TAMPS do not yet incorporate Land.)
- The network planning supporting the LGIP provides for growth infrastructure, complementing the whole-of-life cycle asset planning identified in the TAMPS.
- Council, in determining its ten year capital works programme, gives due consideration to meeting its statutory and community obligations informed by Council's LGIP works schedule and the TAMPS Renewals works schedule.

Thanks and a quick turnaround would be greatly appreciated.
