

To The Resident / Stakeholder

Scholars Drive Link – Sippy Downs

-  Opening of the Link extended to mid July 2022 (site conditions permitting)
-  Scholars Drive Link, between Scholars Drive and Columbia Street, Sippy Downs

Construction Update

Due to the inclement weather conditions experienced during May, construction activity at the Scholars Drive Link site was impacted.

During May, the site received more than five times the average rainfall experienced at that time of the year, which created some challenges for construction progress.

Most civil construction, electrical, security, and landscaping works will be delivered by the first week of July, with some site commissioning works to follow.

The Link is expected to be open to the community by mid-July which will help alleviate traffic congestion on Scholars Drive at school peak hours and enable pedestrian and cyclists to enjoy the use of the link outside of these times.

Council would like to thank all residents and road users for your understanding and continued

patience while we delivered this project to improve traffic efficiency in and around the school precinct.
