Mooloolaba Beach electricity network upgrade

October 2026

Energex is upgrading underground electricity infrastructure in the Mooloolaba beachfront and Esplanade precinct to support Sunshine Coast Council's Mooloolaba Foreshore Revitalisation Project.

Update: works rescheduled

Energex's works, originally scheduled to begin on 18 October, are now expected to start from 1 November and continue for approximately four weeks. The works will support delivery of the Council project while improving the capacity and reliability of the local electricity network.

We apologise for the change and any inconvenience it may cause.

Works overview

Works will take place along Mooloolaba Esplanade between Mooloolaba Foreshore Park and Burnett Street, and on Brisbane Road and First Avenue (see image below).

The works will include night civil works followed by underground cable installation, generally between 9pm and 5am daily, to minimise daytime disruption.

Dates and times may change due to weather, site conditions or operational requirements.

The indicative area of works.

What to expect during construction

Nearby businesses, accommodation providers, residents and visitors can expect the following temporary construction impacts:

- Excavation and civil works
- Construction vehicles and machinery
- Noise and overnight lighting
- Changes to public footpaths, access, parking or deliveries
- Pedestrian detours around the work area

Minimising impacts

Energex will coordinate with Sunshine Coast Council and affected stakeholders throughout the electricity network works supporting the Mooloolaba Foreshore Revitalisation Project.

Safe access will be maintained where possible. We will contact affected stakeholders in advance about impacts to access, parking, deliveries or pedestrian routes, and provide clearly marked detours and signage where required.

Affected customers will receive advance notice of any planned electricity outages through Energex's usual process.

Safety reminder

Please take care near work areas and follow all signs, fencing and traffic control directions.

We appreciate your patience and understanding while we complete these necessary works and recognise the disruption they may cause.

Information for accommodation providers

A Visitor Notice is enclosed for accommodation providers within the works area to copy, display or share electronically with guests staying during the works.
