

Mooloolaba Foreshore Revitalisation

April 2026 Update

Stage Two of the Mooloolaba foreshore revitalisation project continues with more beachfront parkland, new community facilities and improved accessibility on its way.

March marked a huge milestone for the project with the last of 550 underground foundation piles installed for the new terraced seawall that will help to protect Mooloolaba from intense coastal conditions and double as ocean front seating for our community

April will see construction activity taking place in different locations simultaneously throughout the construction site. We will continue to keep our community informed.
