

Moffat Beach reconstruction project

15 October 2024 update

Thanks for subscribing to stay up-to-date on local projects at Moffat Beach, including the seawall reconstruction project.

This update is to let you know there will be a small repair done to the seawall tomorrow, October 16.

As previously advised, we continue to monitor the seawall for signs of movement.

A recent inspection has uncovered a small sinkhole due to a tear in the geofabric behind the wall.

While the sinkhole isn't visible to people in the area, it could get worse if it is not repaired.

There will be a small team onsite to do this work and we don't expect there to be a need for any machinery.

This work will take place outside of the structural root zone of the Norfolk Pines.

Thank you for taking the time to read this update. We will continue to update you as more information becomes available.

Please share this with family and friends who may be interested in Moffat Beach and encourage them to subscribe.
