Petrie Creek Road Upgrade - Rosemount

Project update

As works continue on Stage 2 of the Petrie Creek Road Upgrade project we wish to provide you with a project update.

As advised in our latest July construction notification, the current detour arrangement (via Paynters Creek Road) is expected to remain in place until late November 2026. We will provide advance notice to our community before the closed section of Petrie Creek Road reopens to traffic.

Stage 2 – July to late-November 2026 (subject to weather conditions)

Petrie Creek Road, western intersection with Paynters Creek Road to Eastern Service Road intersection approx. 400m. Road closures and detours are in place.

Works are continuing on:

- Earthworks and major stormwater works, working around existing water main infrastructure
- Road rehabilitation including rebuilding under the road surface
- Construction of two new retaining walls – footings are in place with concrete pours taking place through October.

Refer images of works.

Works to come for the remainder of October and November include:

- New retaining walls blockwork
- Service relocations
- Roadside embankment stability works
- New kerb and channel
- New asphalt (bitumen) to full road section
- Guardrail installation
- Landscaping.

Some Stage Two works will continue once Petrie Creek Road is reopened to through traffic with traffic control or changed road conditions as required for safety.

Details of the road reopening will be provided in the November update.

Construction images below showing Stage 2 major road rehabilitation and drainage works.

Changed traffic conditions

The current detour arrangement via Paytners Creek Road remains in place.

Access to homes and businesses located between the Service Road and the eastern intersection of Paytners Creek Road, is available from the eastern end of Petrie Creek Road only.

Access to local residences and businesses in the closed road section (local traffic only) is via traffic control. No through traffic is permitted.

Signage, including electronic message boards are in place to help motorists navigate the conditions including access to local businesses.

Part Stage 3 and Stage 4 works

To minimise inconvenience to our community, including local businesses, the full extent of Stage 3 works will be postponed until further notice. Part of Stage 3 works and Stage 4 finishing works will take place after Petrie Creek Road is REOPENED to through traffic.

Works will include:

Part of Stage 3 works - completing an approximate 80 metre long section of Petrie Creek Road from the Eastern Service Road intersection transitioning to the existing road (refer map below, red section). Including services relocations, road widening works, new asphalt (bitumen) and line marking which include cyclist awareness symbols.

Stage 4 – finishing works of Stages 1, 2 and part Stage 3 - including guardrail installation, road surfacing, signage and line marking.

For our community's safety, traffic control will be required for some of these works, however Petrie Creek Road will be OPEN to through-traffic.

Contact us

For more information about this project, please visit our website, or call the customer contact team on 07 5475 7272 quoting Petrie Creek Road Upgrade project.

Please share this information with family, friends, staff and suppliers.
