Mooloolaba Trips Context Map

The below image summarises the percentage breakdown of vehicle trips to Mooloolaba. About 60% of vehicle trips to and from the Mooloolaba activity centre have an origin or destination to the south and travel along Brisbane Road. This compares to about 40% of vehicle trips that travel to and from Mooloolaba from the north and use Mooloolaba Esplanade. At least 92% of trips in Mooloolaba have a destination within the Activity Centre of Mooloolaba. Less than 8% of trips are attracted for other reasons.

This means the majority of trips generated by the Mooloolaba area use Brisbane Road, and hence its upgrade is the highest priority Mooloolaba project.
