

# Message from the Mayor

Our Sunshine Coast Council continues to deliver a healthy environment and liveable region – which can be enjoyed by our residents today and those which call the region home in the future.

We recognise that our environment and our lifestyle are two of our greatest assets, and we intend to keep it that way.

After all, our natural environment is one of our region's most defining features and central to our values as a community and our Sunshine Coast way of life.

Our council is investing in and delivering an extensive range of programs and services, often in partnership with dedicated volunteers across our community, to preserve our outstanding natural environment and ensure the Sunshine Coast remains a great place to live.

Our Environment and Liveability Strategy provides the policy blueprint to enable our Sunshine Coast to continue to be one of the greenest, cleanest and most liveable regions in Australia.

The strategy is a great example of council's forward thinking and real actions – taking advantage of opportunities today, while looking ahead to 2041. With our strategy, we're creating a legacy that will benefit our community for many years to come.

In 2018-2019, we continued to strengthen our healthy, smart and creative region in all the right ways. Our council isn't just talking about it – we are delivering on the ground and we are seeing the results. We're preserving and enhancing our natura environment, while promoting a better quality of life through more accessible and well-connected built environments.

At this time, we are also pleased to be releasing our annual Environment Levy and Organisational Environmental Sustainability Benchmarking reports, which further demonstrate some of the initiatives, programs and projects being delivered across our community on our journey to a healthy environment and liveable Sunshine Coast.

I encourage you to visit council's website to learn more about the extensive work our council is delivering to maintain and preserve our outstanding natural assets and the liveability of our region

Mayor Mark Jamieson

## Acknowledgement of Country

Sunshine Coast Regional Council acknowledges the traditional Country of the Kabi Kabi Peoples and the Jinibara Peoples of the coastal plains and hinterlands of the Sunshine Coast and recognise that these have always been places of cultural, spiritual, social and economic significance. We wish to pay respect to their Elders – past, present and emerging – and acknowledge the important role Aboriginal and Torres Strait Islander people continue to play within the Sunshine Coast community.

Council is committed to ongoing communications and consultation with the Traditional Owners and the broader Aboriginal and Torres Strait Islander community of the Sunshine Coast in the implementation of the strategy.

## Appendix A

## The Environment and Liveability Strategy

Our strategy was adopted in September 2017. This Annual Report showcases our second year of implementation.

## What is the purpose of the strategy?

Coast for future generations to 2041.

the liveability of the region. It enables a good quality of life for all residents, while supporting a strong economy in an accessible and well-connected built environment.

### Why is it needed?

In this rapidly changing world there are many challenges and opportunities for our much-loved Sunshine Coast way of life. We face an increasing population, changing climate, economic growth and emerging technologies.

The strategy helps us to navigate through these challenges while harnessing opportunities. Its integrated and long-term approach to guiding development of the Sunshine Coast offers clarity, inspiration and direction.

The strategy is a forward-looking document and seeks to do things differently.

## Our progress

We use annual performance measures to help us monitor and track progress.
