About the Operational Plan

The Operational Plan 2012-13 is a significant document in Sunshine Coast Council's strategic corporate planning framework, and is council's fourth Operational Plan under the current Corporate Plan 2009-2014.

The Operational Plan 2012-13 reflects council's continued commitment to achieving council's vision of being: *Australia's most sustainable region – vibrant, green, diverse*. The Operational Plan focuses on key projects and activities for the next twelve months, consistent with council's Corporate Plan and overall strategic direction.

The Operational Plan and Annual Budget are complementary documents. The Operational Plan outlines what's to be achieved and the Annual Budget allocates funding.

Components of the Operational Plan

The Operational Plan illustrates the corporate plan strategies, activities, projects and performance indicators for council over the next 12 months. The information is presented under the Corporate Plan 2009-2014 themes:

1. Robust economy
2. Ecological sustainability
3. Innovation and creativity
4. Health and wellbeing
5. Social cohesion
6. Accessibility and connectedness
7. Managing growth
8. Great governance

Integrating the Operational Plan

Activities and projects from the Operational Plan are incorporated into Department's Branch Plans, Service Snapshots and Profiles. Each department is then responsible for the delivery of their allocated activities and projects.

Monitoring the Operational Plan

Key indicators are used to monitor implementation of the Operational Plan. The indicators are used to measure the status and achievement of activities and projects against the following criteria:

- a) on time;
- b) within budget; and
- c) quality standard (where applicable)

Reporting on performance is through the Chief Executive Officer's Quarterly Progress Report and the Annual Report. Both reports are public documents which are presented to council and made available to the community.

Managing Operational Risks

The Operational Plan takes into account council's Enterprise Risk Management Framework based on International Standard ISO 31000. The framework allows for identification, assessment and reporting on strategic, operational and project based risks.
