Traffic Guidance Scheme

Appendix B

Sign Specifications

1 Introduction

This Traffic Management Plan (TMP) sets out the requirements to encourage the safe and disciplined movement of traffic through and around the Peregian Beach Village for the staging of the Peregian Beach Markets and Peregian Originals.

2 Background

Peregian Beach Markets and Peregian Originals are community-based events held on the first and third Sundays of every month, weather permitting.

In 2011, a TMP was developed and has been implemented twice. However, it should be noted that, strictly speaking, the document created in 2011 is not a TMP as only a traffic guidance scheme (TGS) was developed. Furthermore, this TGS does not meet the minimum requirements of the *Manual of Uniformed Traffic Control Devices* (Part 3 Works on Roads) 2010 (MUTCD).

This TMP supersedes the TMP created in 2011 and will be implemented on every event day.

3 Objectives

This TMP aligns with the transport objectives of the Peregian Originals Operational Plan, which are:

- 1. to continue to develop and implement sustainable transport strategies that ease congestion;
- 2. to encourage patrons to take advantage of active options where possible, such as walking and cycling;
- to provide clear information on transport options to and from Peregian Originals; and
- 4. to work with Sunshine Coast Regional Council's Sunshine Coast Sustainable Transport Strategy 2011-2031 and Sunshine Coast Active Transport Plan 2011-2031.

This Traffic Management Plan also aligns with Peregian Beach Markets transport objectives which are:

This primary focus of this TMP is to encourage motorist to use the under-utilised parking area along Rufous Street. The TGS in Appendix A show the location of newly designed signage to direct motorists to this area. It is expected that, by encouraging motorists to drive to Rufous Street to park, congestion will ease around the Village precinct.

4 Activities

On days the events are being held, authorised persons will erect signage, in accordance with the TGS shown in Appendix A. These signs will direct motorists to travel to Rufous Street to park. From Rufous Street, people can walk to Peregian Beach Park.

Event organisers will also advise members of the public of the preferred parking and public transport options by the use of social media (Facebook) and the Peregian Originals (www.peregianoriginals.com, www.peregianoriginals.com, www.peregianoriginals.com, and Peregianoriginals.com, www.peregianoriginals.com, www.peregianoriginals.com

Regular and frequent broadcasts will be made on Noosa Community Radio advising of preferred parking and public transport options.

Furthermore, during the events, organisers will:

- make announcements about public transport options;
- provide hardcopies of the timetable for Sunbus Route 620; and
- will encourage people to car pool

5. Times of Work

Peregian Beach Markets and Peregian Originals occupy Peregian Beach Park from 7am to 5pm on the first and third Sundays of each month, weather permitting. The signage shown in the TGS shall be installed by 7am and removed by 6pm on these days.

6. Placement of signs

Authorised persons installing and removing signs in the road reserve shall do so in accordance with MUTCD.

TRAFFIC MANAGEMENT PLAN JULY 2012

7. Personnel Protective Equipment

Authorised persons installing and removing signs in the road reserve shall wear the appropriate personnel protective equipment, such as high visibility vests, in accordance with the MUTCD.

8. Sign specification

The specifications of the sign faces are detailed in Appendix B Sign Specification. The sign faces must be constructed of a lightweight material, such as corflute. As the signs will only be erected in daylight hours, they are not required to be constructed of retroreflective material.

The signs shall:

- be mounted on a lightweight softwood timber steak. The dimensions of the timber steaks shall be no bigger than 50mm x 25mm;
- not be attached to a tree, power pole, or any or any other road furniture;
- not overhang any portion of a traffic lane;
- not present a hazard to road users; and
- not interfere with or restrict the movement of pedestrians or cyclists

9. Documentation and Work Revision

An essential element of traffic management for any project is the accurate completion of records with respect to all traffic control changes and inspection of the traffic control devices.

Authorised persons will set out signage in accordance with the traffic guidance schemes and perform regular checks on signage during the course of the day.

Before event commences:

- Authorised persons will set out signage as per the traffic guidance schemes and in accordance with the MUTCD.
- Drive through the area to check for safety and effectiveness of traffic management arrangements and record observations.
- Event organisers are to complete mandatory pre-start hazard identification and risk assessment paperwork.

During event:

- Perform regular checks of signage.
- Correct and record any incidents.

End of event:

- Make sure area is safe for traffic to use.
- · Removal of all signage from area.

10. Onsite Contacts

On site contacts for the Peregian Beach Markets and Peregian Originals are listed below.

Peregian Beach Markets: XXXX XXXX

PH: XXXX XXX XXX

XXXX XXXX

PH: XXXX XXX XXX
