The bin enclosures are identified throughout Council's endorsed Landscape Infrastructure Manual.   | Kunda Park, Queensland        |
| Infrastructure Services                 | Waste and Resource Management       | Great Lakes Community Resources Inc                             | Wastewell                         | Wastewell provide a tipwell bin, allowing recycled material to be off loaded at group level and then lifted into the skip with mechanical means.   | The tipwell bin is a propriety product of Wastewell.  | Tuncurry, NSW                 |
| Infrastructure Services                 | Transport Infrastructure Management | NBN Co Limited  | NBN Co                            | Design and works services to proposed future works and or alterations on NBN Co's infrastructure   | NBN Co do not allow any other companies conduct design or construction work, for assets affecting the NBN Co's Network. For this reason they are the only supplier for work on the NBN Co's network.  | North Sydney, New South Wales |
| Infrastructure Services                 | Waste and Resource Management       | Newcastle Weighing Services Pty Ltd                             | Newcastle Weighing Services       | Provision and support for landfill and transfer station point of sale "WasteMan2G" software currently installed at 18 locations across the region  | WasteMan2G is a corporate software application for Council, and Newcastle Weighing Services is the developer and only supplier of this software. This point of sale software is used extensively by Council's Waste and Resource Management branch at transfer stations across the region.  | Wickham, New South Wales      |

|                          |                                     |                                       |                             |  |   |                            |
|--------------------------|-------------------------------------|---------------------------------------|-----------------------------|--|---|----------------------------|
| Infrastructure Services  | Project Delivery                    | Optus Networks Pty Ltd                |                             | Telecommunications - Design and works services to proposed future works and/or alterations to Optus Infrastructure.  | Optus do not allow other companies to conduct design or construction work for assets affecting the Optus Network.   | Cannon Hill, Queensland    |
| Infrastructure Services  | Fleet and Quarry Services           | RACQ Operations Pty Ltd               |                             | Roadside assistance for flat batteries, flat tyres, and towing for light vehicles.   | RACQ are the only provider in Queensland for this service.  | Springwood, Queensland     |
| Infrastructure Services  | Transport Infrastructure Management | Raylinc Agencies Pty Ltd              |                             | Supply of WE-EF range of lights, used for footpath lighting  | Raylinc is the only Australian importer and supplier of the WE-EF range of lights.  | Acacia Ridge, Queensland   |
| Infrastructure Services  | Project Delivery                    | Sensei Project Solutions Pty Ltd      |                             | Support of Council's project management software MS Project Online through application development, user training, modification and development of reports, Technology One integration amendments, and Report Hub hosting.             | Sensei Project Solutions provide support for Council's project management software, MS Project Online, with training, reports, and Report Hub hosting. As part of this support, Sensei Project Solutions have designed custom reports for Council. The Report Hub hosting is considered a corporate application for Council, for its integration to MS Project Online.  | Brisbane, Queensland       |
| Infrastructure Services  | Transport Infrastructure Management | Telstra Corporation Limited           | Telstra                     | Design and works services to proposed future works and or alterations on Telstra's infrastructure  | Telstra do not allow any other companies conduct design or construction work for assets affecting the Telstra Network. For this reason they are the only supplier for work on the Telstra network.  | Melbourne, Victoria        |
| Infrastructure Services  | Waste and Resource Management       | The Trustee for the Ross Family Trust | Lockmaster Locksmiths       | Proprietary security key and locking services at the Waste and Resource Management facilities.   | Lockmaster is the only supplier of the master key application at Waste and Resource Management facilities.  | Maroochydore, Queensland   |
| Infrastructure Services  | Waste and Resource Management       | Turbid Pty Ltd                        | Turbid Stormwater Solutions | Technical support and maintenance of automated stormwater monitoring and dosing system at waste management sites.  | Turbid installed the stormwater monitoring and automated coagulant dosing systems at the waste Management sites. The maintenance and correct programming of these systems are integral to Council's environmental compliance. Turbid built the systems and have intimate knowledge of :<br>1. how the systems work<br>2. the best (hard-wearing) components for use<br>3.the dosing rates required to treat stormwater without overdosing with chemicals<br>As the systems in place at the waste management sites are custom built by Turbid, they are the only supplier that can provide ongoing support and maintenance to the systems.   | Peregian Beach, Queensland |
| Infrastructure Services  | Transport Infrastructure Management | University of Sunshine Coast          |                             | Specialised research into developing new technologies and data for improved predictive flood modelling and optimisation of culvert design processes to reduce flooding, environmental damage and community cost on the Sunshine Coast. | These type of collaborative research programs between SCC and USC are only feasible due to the specialised nature of research required, and given USC offer free university research time undertaken by under/post graduate engineering students with supervision from USC's faculty. The benefits/advantages of working with USC include; access to the expertise and resources of USC; network linkages to the national and international research community; awareness of new technologies likely to impact upon the organisation; the distinctive approach applied to all research and development activities undertaken by the University. An integral part of the culvert study will be the development of a fully functioning Culvert Performance Testing Rig (CPTR). The CPTR will become a valuable collaborative research (and teaching) resource that will be utilised for future flood studies by USC and SCC for many years to come. | Sippy Downs, Queensland    |
| Planning and Environment | Transport and Infrastructure Policy | BMT WBM Pty Ltd                       |                             | Flood modelling software advice  | BMT WBM is the manufacturer and only supplier of TUFLOW 2-D Hydraulic Flood Modelling software. This software has been used to create models specific to areas across the Sunshine Coast region, and when updates of those models are required, the software needs to be used to update the models. The models using the TUFLOW 2-D Hydraulic Flood Modelling software have been developed by Council, or inherited from developers or State agencies.  | Brisbane, Queensland       |

|                          |                                       |  |                  |  |   |                              |
|--------------------------|---------------------------------------|--|------------------|--|---|------------------------------|
| Planning and Environment | Transport and Infrastructure Policy   | DHI Water and Environment Pty Ltd        |                  | Flood modelling software advice  | DHI is the manufacturer of the MIKE series of 1-D and 2-D Hydraulic Flood Modelling software (MIKEFLOOD, MIKE11). This software has been used to create models specific to areas across the   | Brisbane, Queensland         |
| Planning and Environment | Transport and Infrastructure Policy   | Elpro Technologies Pty Ltd               |                  | Provider and repair of electronic equipment in stream and rain gauges  | Elpro Technologies Pty Ltd is the only company that manufactures and provides this hydrographic equipment in Australia.   | Stafford, Queensland         |
| Planning and Environment | Environment and Sustainability Policy | Healthy Waterways and Catchments Limited |                  | Healthy Waterways is a not-for-profit, non-government organisation that works collaboratively with stakeholders across southeast Queensland to improve waterway health. The Healthy Waterways network is made up of a consortium of more than 30 community, industry and government organisations, providing a range of design, evaluation, and monitoring services for members. | Healthy Waterways provide a unique collaborative approach to South East Queensland waterway management. As a financial member of the consortium, Council benefit from the findings of the regional waterway health monitoring.  | Brisbane, Queensland         |
| Planning and Environment | Transport and Infrastructure Policy   | Microcom Pty Ltd                         | Metrocount       | The Metrocount traffic counters are specialised equipment for the classification and counting of traffic. The counters are available in a range of formats that cover Council's requirements.  | Metrocount software is a corporate software application for Council. Extensive work has gone in to ensuring that the data from the Metrocount software meets Council's requirements reporting on traffic counts. The Metrocount software only works with the Metrocount traffic counters. These counters are used extensively by Council officers in understanding traffic on Council roads. Metrocount is the only supplier of both the software and the counters. | Fremantle, Western Australia |
| Planning and Environment | Transport and Infrastructure Policy   | Pentagon Systems (Qld) Pty Ltd           | Pentagon Systems | Pentagon Systems provides information technology solutions for the effective management of Council's traffic counting facilities.  | Pentagon Systems has developed a remote software that uniquely integrates with the Metrocount counters and software. The Pentagon software is a corporate software application for Council. Pentagon Systems is the only company that provide this remote access to retrieving data from the Metrocounters, and are the only supplier of the software.  | Mount Gravatt, Queensland    |
