

- 1. For general design and construction notes refer to DS-078.
- 2. WSUD kerb shown is only suitable for street tree pits and small raingardens. Larger systems may need specific inlet design or multiple inlets.
- Where no parking lane exists, RHS kerb inlet may be replaced by an open kerb cut.
- Ensure tree pit drainage is connected to stormwater system to avoid flooding the tree.

- Filter media specification shall be in accordance with the 'Guidelines for Soil filter Media in Bioretention systems' (FAWB) and the Bioretention Technical Design Guidelines (Water by Design). Bioretention hydraulic conductivity shall be in accordance with 'Practice Note 1: InSitu Measurement of Hydraulic Conductivity' (FAWB). The number of samples to be tested shall be in accordance with the 'Construction and Establishment Guidelines -Swales, Bioretention Systems and Wetlands' (Water by Design).
- 8. Transition layer and drainage layer specifications to be in accordance with Bioretention
- 9. All dimensions in millimetres unless specified otherwise.
