

In relation to the traffic count surveys it should be noted:

- All traffic counts carried out between August 2008 and March 2013 have shown that volumes and speeds dropped while the speed cushions were in place.
- Vehicle volumes and speeds have risen since the speed cushion devices were removed and have now returned to slightly less than the results prior to the speed cushion installation.
- Traffic counters at the eastern end of Lamerough Parade were vandalized during both the July 2012 and March 2013 count.

For the purposes of completeness a summary of the traffic counts survey data by location (as per the map) has been provided below.

Site 1

	Aug-2008	Jun-2010	Aug-2011	Jul-2012	Mar-2013
