COUNCILLOR COMMENT - OPTIONAL

The applicants have been working on this major renewable energy project for over 2yrs.

During that time the DA was approved in June 2011 and included considerable community consultation together with unanimous Councillor support.

Discussions have been held with the Chief Executive Officer and various council officers over the last six months which includes modelling on the possibility of council sourcing some of its electricity needs from the proposed facility.

There are critical time constraints for this important regional project that requires council's urgent attention.
