

Project number: P-H4602

Woombye Streetscape Project

Asphalt (bitumen), line marking, kerb and ongoing works

Wednesday 24 May to Friday 2 June, 6am – 6pm (Saturday and Sunday excluded)

Weather and site conditions permitting

Blackall Street, Woombye

Some temporary changes to traffic conditions – including traffic control in operation

Construction overview

With fine weather forecast for the next week or so, asphalt (bitumen) and line marking works are planned for Blackall Street. These works involve profiling (scraping back) the road surface and filling in excavated areas including the sections adjacent to the new kerbs and raised pedestrian crossings.

A short section of kerb and channel (between Woombye Mechanical Repairs and the Woombye Hotel driveway) will also be replaced. This will take place from Wednesday 24 to Friday 26 May.

To limit inconvenience to businesses and residents and maintain daytime traffic flow on Blackall Street these works will be undertaken in sections with stop/go traffic control in operation.

Other works including landscaping, the installation of street furniture and electrical/lighting works will continue simultaneously.

Temporary changes to traffic conditions

Pedestrian/customer access will be maintained to all buildings. In some cases, vehicle access will be **temporarily unavailable** for short periods of time when asphalt is being laid near driveways or loading zones.

Some areas of on street parking will be temporarily unavailable while asphalt and line marking works are in progress.

The contractors will work up and down the street as quickly as possible and liaise directly with adjacent businesses.

Please allow an extra 5-10 minutes of travel time during these works.

What to expect during construction

Large trucks and machinery will be operating. While the construction team will try to mitigate noise as much as possible, some intermittent noise and dust is to be expected.

Businesses remain open

All businesses will remain OPEN as per normal trading hours. Thank you for continuing to shop local.

Contact the project team

For any questions about these works, please email the project team on:
