Artworks

A range of public artworks were installed as a part of council's 2013 streetscape revitalisation works. Ocean environment and beach lifestyle were the prevailing themes expressed.

Simone Eilser installed a range of organic bronze sea sculptures sequentially linking the shopping strip with the village square. Sculptures range from clusters of sea urchin balls, turtle shells, to a 2m tall octopus element. A painted mural by Blair McNamara was installed adjacent to the village square, depicting the colourful beach culture and history of South Marcoola.

All artworks must comply with council's art policies and guidelines. Refer to public art register for existing works.

Gateway and Entry Features

Threshold gateway treatments for the Marcoola South centre are expressed through a combination of planted roundabouts, street trees and the neighbouring tall architectural built forms framing the linear strip.

Materials Palette

The centre's materials palette is strongly influenced by the coastal environment. The use of sandy pavement colours, locally native plant palette and recycled timber custom furniture combine to create a natural beachside atmosphere.

Timber:

Recycled hardwood timber for natural weathered appearance. Strength as required for structural purposes. Treatment: Lanotec Timber Seal Plus or approved equivalent.

Steel: Marine grade 316 SS, linished/satin (no. 4 finish)

Copper or brass may be used as feature finishes.

Stone: Stone faced walls to be Prophet Rock 150 - 300mm max.

Pathway: Coloured concrete with exposed aggregate in wave like pattern. Refer to Schedule of Finishes and Streetscape Detailed Drawings.
